

PCI Card Checker

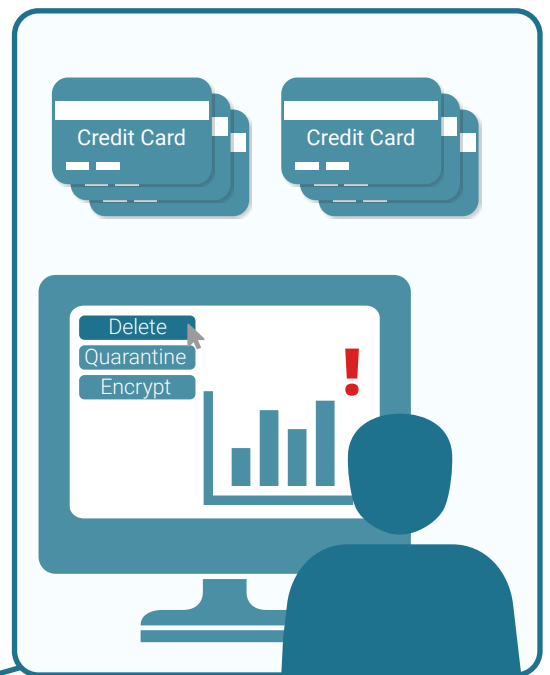

Need to discover CHD enterprise wide? Want to reduce PCI-DSS scope and achieve regulation compliancy quicker?

As data **grows exponentially** IT departments have long since had any firm grip on enterprise's data or the infrastructure that carries it. Untended proliferation of card holder data (CHD) within organizations is common place but not common knowledge.

With an increase in compliancy and regulation requirements the challenge of **discovering** and **remediating** CHD risk becomes an uphill battle.

PCI CardChecker is a **network based** scanning software solution, which discovers, remediates and reports on Card Holder Data at rest **centrally** from one pane of glass. Streamlining compliancy and regulation assessment / certification processes.

The solution empowers enterprises to efficiently respond to compliancy and regulation requirements such as PCI-DSS.

Discovered data can be reviewed, **permanently deleted** or encrypted and reported on centrally from one pane of glass.

Critical data auditor helps determine the location, access, value and protection states of CHD enterprise wide across network resources such as PC, laptops, file servers and emails. The solutions **quick evaluation and identification** of CHD expedites gap analysis in addition to offering **multiple remediation** options to close the gaps.

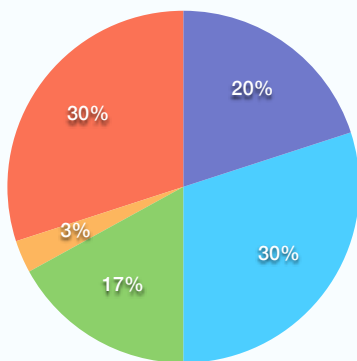

Achieve your goal

-  **Reduce** your PCI-DSS **scope** and focus efforts and resources
-  Assist compliance capabilities with PCI DSS, ISO 27001, SOX, HIPPA and Data Protection standards such as GRDP .
-  Satisfy freedom of information requests **“right to be forgotten”**, competition authority investigations, **e-discovery** orders and HR processes.
-  Conduct **due diligence** prior to acquisitions or during audit.
-  **Discover relevant** data in criminal or civil investigations
-  Measure security policy effectiveness and uptake.

How

- ✓ **Full PCI Auditor** Functionality built in:
 - Track 1, track 2
 - PAN; Primary Account Number
 - Key searchable criteria (credit card provider name, expiry date etc.)
 - Additional customizable search's.
- ✓ **Built-in OCR engine.** Strips and discovers text in images (scanned credit cards).
- ✓ Powerful **rules engine** for custom expressions.
- ✓ **Rapid file interrogation** and analysis, proven market leader throughput.
- ✓ Multi-threaded, **scalable** solution ensuring maximum performance across all sized organisations.
- ✓ Scan over **150 file types**.
- ✓ Generates intelligent and **actionable reporting** for PCI and other regulations.
- ✓ **Centrally action** on data; permanently delete, quarantine and encrypt.
- ✓ **Full** audit trail.

Sample Report Card Data by Description

- 1 Credit Card Found (20%)
- Between 11 and 100 Credit Cards Found (30%)
- Between 2 and 10 Credit Cards Found (17%)
- Greater than 1000 Credit Cards Found (3%)
- Keyword found with Credit Card numbers (30%)

DESCRIPTION	FILES
Policy 1 - Track 1 or Track 2	0
Policy 2 - > 1000 Card Numbers	233454
Policy 3 - 101 to 1000 Card Numbers	316
Policy 4 - 11 to 100 Card Numbers	283493
Policy 5 - 2 to 10 Card Numbers	164003
Policy 6 - 1 Card Number	1873020
Policy 7 - Keywords found	2809763
