Microsoft

What is the Manufacturing App?

VOX ISM's Manufacturing App helps organizations implement the Microsoft software more quickly based on their industries' requirements. The APP has 3 main features:

1. Software
2. Implementation Tools
3. Customer Support

The APP, significantly reduces

implementation times, cost, and risks.

MANUFACTURING APPS

Manufacturing
Dynamics 365

Screens and data are configured out of the box for Canadian Manufacturers. Includes access to Canada CRM, MARS, and Connectors Apps.

TEST DRIVE

Canada CRM
Dynamics 365

Configured to optimize sales & marketing performance. Add-on modules include CASL, HR, AR collections, IT help desk, and MARS & Connectors Apps.

TEST DRIVE

MARS
Dynamics 365

This Management Analytics Reporting Suite has pre-configured NAV and D365 Role Centers, configured main forms, ready to go Power BI dashboards and reports, and BI cubes.

TEST DRIVE

Productivity First

VOX ISM's Manufacturing Apps are primarily focused around the needs of the typical small to medium size manufacturer (25 to 500 employees).

Most of the features are designed to increase the speed, productivity and flexibility of the system and allow the average office worker to do more with less.

In general the APP's features are divided in 4 sets

1. Searching
2. Copying/Setup
3. Over/Under Shipping/Receiving
4. Bulk 'Accept All' or Change Status

The benefit of the VOX ISM Manufacturing App is that it was created out of our user base's needs and requests. Each enhancement was a direct result of not one but several people requesting the same feature/function. So instead of building and charging each customer we built the App for all customers and enhance the product every year.

Dynamics 365 Business Central Features

VOX ISM

Features List for Manufacturing App

- List Pages
- Sales Order Line
- Master data – copy
- Copy Item Card
- Setup – item template (no presets)
- Make a new Item from an existing (copy)
- Copy Customer Card
- Setup – Customer template (no presets)
- Copy Vendor Card
- Setup – Vendor template (no presets)
- Function – Ability to Over/Under Receive on Purchase Orders
- Function - Ability to 'Accept All' toggle on the Planning Worksheet
- Function – Ability to 'select multiple' Production Orders to change their status
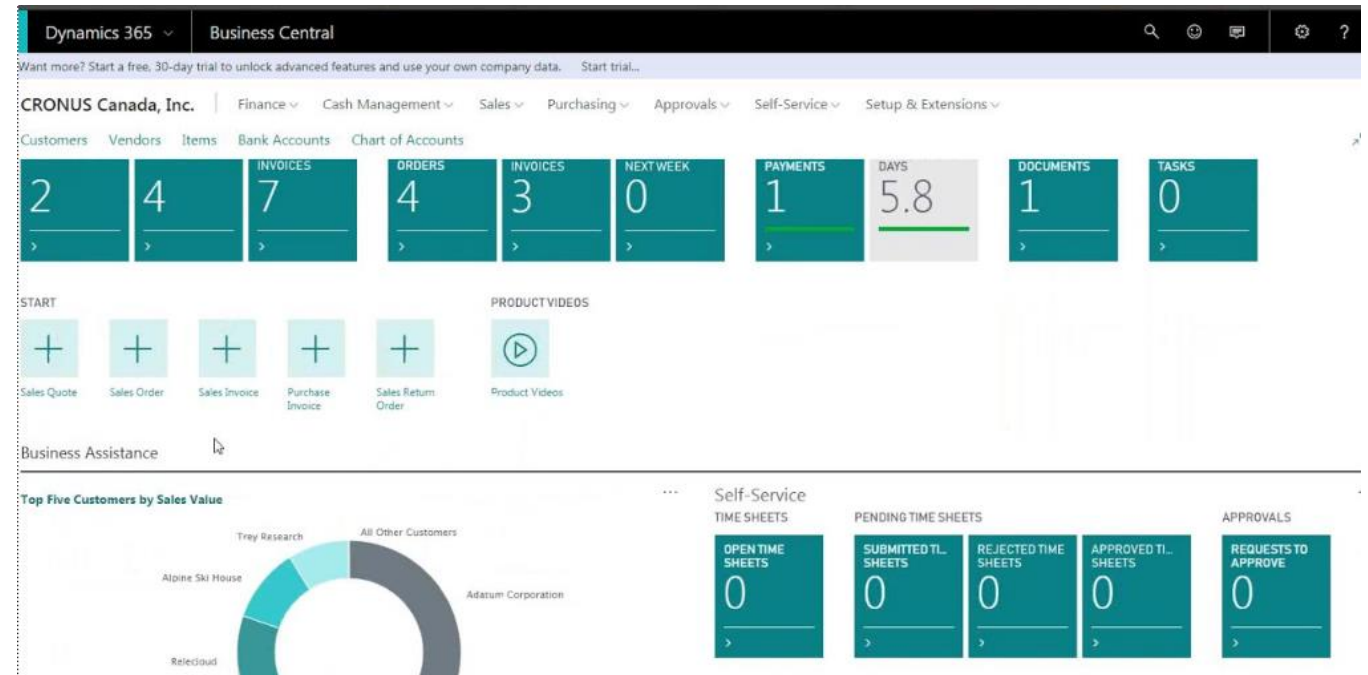

Over/Under Receiving

What is three-way matching?

Three-way matching is a procedure for processing a vendor invoice to ensure that a payment is complete and accurate. The goal of three-way matching is to highlight any discrepancies in three important documents in the purchasing process – purchase orders, order receipts/packing slips, and invoices – in order to save businesses from overspending or paying for an item that they did not receive.

Standard Dynamics 365 Business Central prevents the user from receiving more than the original purchase order quantity.   In many manufacturing companies the receiver is not the same person as the purchasing agent. The receiver cannot change the original purchase order and needs to enter what was received whether it is under or over the initial request.   In the case of steel, plastic, or food the typical unit of measure is lbs and 2-10% over the initial request on the purchase order is a normal process.

This is why we created a prompt with the ability to over-receive or under receive. This prevents re-issuing or re-approving of the existing purchase order and provides an accurate match to the invoice.
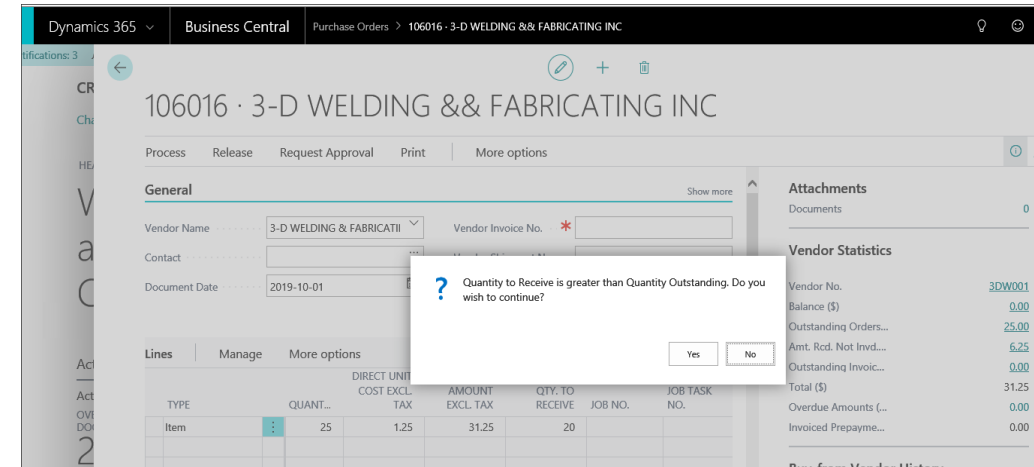

Searching Lists

Line items refer to the detailed items, quantities and prices on many of the transaction documents found throughout the system.

Many users request the ability to see the line item tables for the purposes of

1) Searching and finding the same item on a different order
2) Building reports
3) Creating views to better manage process (i.e. all late unshipped orders)
4) Troubleshooting/diagnosing issues in the ledger
5) Exposing all fields on the table for better visibility
6) Ad-hoc queries

Examples:
1) Your customer phones and asks if their product has been shipped, you can quickly search by item number and see all of the orders with the same item.
2) The production manager asks for an itemized list of all product that needs to ship in the next 2 weeks
2) The boss phones and asks for the total number of parts shipped today
3) Finance phones and believes receiving mixed up receipts between 2 purchase orders and can you investigate.
