Key Aruze services

VCV Education is an ecosystem of tools for video communication and all kinds of assessment. The platform perfectly fits for holding the admission process, recording lectures for distant learning, holding oral exams, arranging Q&A sessions for students and professors and other events upon client's request for students, professors and staff. Unlike other video conferencing tools, VCV's time-saving asynchronous format and a unique auto proctoring system with 4 types of protection allows teachers to make sure that students are not cheating. Especially relevant during COVID-19 when there's no other way to check student knowledge and hold exams other than in online format. With VCV it's more productive, fast and less stressful for both sides. [Here is a video](#) to see how the platform looks from inside.

A focus on [educational institutions](#) and schools of any specialization.

N/A

Educational institutions and schools of any specialization around the world. USA is the main focus.

Moscow, Russia ● Tokyo, Japan ● San Francisco, the US
