

DSI® Print Envoy

Enterprise Label Integration for D365 for Finance and Operations

Instantly Print Enterprise-Grade Labels Directly From the D365 Interface

DSI's Print Envoy is a fully-integrated label printing system for Dynamics 365 for Finance and Operations

Print Envoy provides a quick and simple method for linking Dynamics 365 to many of the most popular enterprise labeling platforms, including DSI EPP, Bartender, Software, TekLynx and CodeSoft. With smooth, seamless integration directly into your business processes and the D365 interface. Print Envoy's familiar interface and flexible configuration options add up to a pain-free implementation.

Fast, Flexible and Configurable

- Print setup couldn't be easier. Automated setup tools configure Print Envoy as you use D365
- Dynamic data integration ensures everything D365 knows about your inventory is available to send to labels—even your own custom fields
- Establish context-sensitive rules to dynamically determine label routing and printer selection
- Powerful, yet easy-to-use API provides the ability to set print actions anywhere in D365 that you (or your VAR) wish, with a single line of code
- Print Envoy's Courier Service allows for transmission of labels to remote servers both in the cloud and on-premise
- 24/7/365 software and hardware support through DSI's Customer Success Center

Versatile Integration Options

DSI Print Envoy integrates with all the most common enterprise labeling solutions, allowing you to create a seamless flow of communications and transactions to optimize your printing workflow.

AVAILABLE ON
Microsoft AppSource

Ready-to-Print Features

Print Envoy is pre-wired to support most environments where labels are likely to be printed. Print Envoy gives users the option to print automatically upon posting or on request via integrated print buttons.
