

### ***Commerciant SYNC for SAP B1 and Microsoft Dynamics 365***

Commerciant SYNC, the #1 data integration platform that integrates your data between SAP B1 (Business One) and Microsoft Dynamics 365. The Commerciant SYNC Agent is rapidly deployable and gives you access to your SAP B1 customer and order information in Microsoft Dynamics 365. We work with the following: SAP, SAP Business by Design, SAP Business One version 8 (and up), SAP Business One Version 9.1, and SAP Business One version 9.2 and higher – this also includes Datalogix, and Vantive.

### ***About SYNC:***

Commerciant SYNC is created by ERP and CRM data integration experts. By having that, SYNC creates a simple data integration pathway between your SAP B1 and Microsoft Dynamics 365. Once the data integration takes place, your SAP B1 data is automatically loaded into your Microsoft Dynamics 365 without programming, coding, mapping or servers required. SYNCing data is a cloud-based experience that ensures your data is protected. SYNC has the following benefits:

- Data integrated from SAP B1 to Microsoft Dynamics 365 becomes native data inside Microsoft Dynamics 365 CRM. Being native data inside the CRM means bringing data from your SAP B1 over to Microsoft Dynamics 365 in which you can perform any function from that data and manipulate it to the way you need it, for example, connecting to third-party apps and creating dashboards
- Inside Microsoft Dynamics 365, the system provides the function of a user-friendly search engine to look up data that is SYNCed from SAP B1 because the data is native, it is searchable. For instance, looking for a serial number that relates to a Sales Order record or Invoice Record
- The Commerciant SYNC app developed for SAP B1 and Microsoft Dynamics 365 detects changes in either database whether it is SAP B1 or Microsoft Dynamics 365 and SYNC only those changes in the data within either system

### ***What if I have an existing Microsoft Dynamics 365 database?***

When you have existing data in both systems (SAP B1 and Microsoft Dynamics 365) the following steps will take place, first, the data will need to be backed up, second, you will come to a point when integrating the data and you will have to do deduplication on 3 items that we have a native function inside our Commercient SYNC app that also leverages artificial intelligence(AI) for following items listed below:

- Accounts: Deduplication happens here when customer names are spelled incorrectly and deduplication for child-parent relationships, form part of the standard purchase of Commercient SYNC at no additional costs.
- Customers: They need deduplication as there are customers with no accounts that are contacts and there is an AI for this.
- Products/Items: Deduplication happens for this when there is a different item description over the same product.

## What does SYNC offer?

Customers in SAP B1 are integrated into Microsoft Dynamics 365. The first item to be SYNCed is your **AR Customer Record** and once this is completed, all the fields can be shown. Customers Ship To and Bill To address in SAP B1 are merged into Microsoft Dynamics 365, which can be displayed according to their needs. By clicking on the SAP B1 Customer Record, you can see all the fields that are synchronized.

The screenshot displays the Microsoft Dynamics 365 interface for the 'Sandia National Labs' account. The interface is divided into four main sections, each with a corresponding callout box on the right:

- Customer Records:** A table with columns: Customer Name, CREDIT HOLD, CUSTOMER TYPE, CURRENT BALANCE, CREDIT LIMIT, LAST PAYMENT..., DATE LAST..., and DATE LAST... The data row shows: Sandia National Labs, N, HOUS, 160,740.00, 100,000.00, 84,492.30, 9/10/2014, 9/30/2014.
- Open Sales Orders:** A table with columns: SALES ORDE..., Account\_R, SALESPE..., ORDER..., ORDER..., ORDER..., CUSTOMER..., BILL TO NAME, WAREH..., and NON TAXABLE AMT. The data row shows: 1412189, Sandia National Labs, 1000, 8/6/2014, O, S, SAN, Sandia National Labs, 100, 47,600.00.
- Invoices:** A table with columns: INVOICE..., BILL TO NAME, Account\_R, AMOUNT SUBJE..., INVOICE D..., INVOICE DUE D..., INVOICE TY..., PAYMENT T..., and CREDIT CARD P... The data rows show:
 

INVOICE...	BILL TO NAME	Account_R	AMOUNT SUBJE...	INVOICE D...	INVOICE DUE D...	INVOICE TY...	PAYMENT T...	CREDIT CARD P...
0243826	Sandia National Labs	Sandia National L	80,370.00	7/28/2014	8/12/2014	IN	---	0.00
0243921	Sandia National Labs	Sandia National L	0.00	7/29/2014	1/1/1900	CM	---	0.00
0248814	Sandia National Labs	Sandia National L	160,740.00	9/30/2014	10/15/2014	IN	---	0.00
- Ship To Address:** A table with columns: SHIP TO NAME, Account\_R, SALES PERSON NO, CONTACT CODE, SHIP TO CITY, SHIP TO STATE, and CUSTOMER NO. The data row shows: SANDIA NATIONAL LABS, Sandia National Labs, 1000, ---, ALBUQUERQUE, NM, SAN.

## Sales Order With Line Item Details

Once the Customer Record is in Microsoft Dynamics 365, Commerciant then SYNCs the **Sales Orders and their Detail Lines** which relates them to the corresponding Microsoft Dynamics 365 Account record. A customer object is then created in Microsoft Dynamics 365 as the Sales Order data and Invoice Sales Order data is combined into one, since each customer's needs are unique. This allows customers to see their invoices that have their orders and details as well as, viewing the different statuses of their sales orders as they change in SAP B1. When removing SAP B1 Sales Order data that has been canceled from Microsoft Dynamics 365, it performs automatically.

The screenshot shows the Microsoft Dynamics 365 interface for an invoice. The main section is titled "Invoice Line Items" and contains a table with the following data:

ExternalKey ↑	INVOICE...	ITEMCO...	ITEMCODEDESC	UNITCOST	UNITOF...	UNITPRI...	VALUATI...	WAREHOUSECODE	COMMISSIO...	COST
0243826:000000:00000	0243826	CUSTOM	CUSTOM ITEM: UL...	23.50	EACH	8,037.00	3	000	0.00	---
0243826:000000:00000	0243826	/C	Default Item Code...	0.00	---	0.00	---	---	0.00	---
0243826:000000:00000	0243826	/C155	REQUESTED DELI...	0.00	---	0.00	---	---	0.00	---

Below the "Invoice Line Items" section is the "Invoice Payments" section, which contains a table with the following data:

INVOICEENO	TRANSACTIONAMT	TRANSACTIONTYPE	CHECKNO	TRANSACTIONDATE	Invoice_R	ExternalKey ↑
0243826	-382.20	Credit Memo	---	7/29/2014	0243826:000000	00:SAN:0243826:IN:7/29/2014

A blue callout box on the right side of the screenshot points to the "Invoice Line Items" table with the text "Sales Order With Line Item Details".

## Sales Order Screen Showing Account Object

Commercient has designed the relationships with the data objects in Microsoft Dynamics 365 that can give you the freedom to decide which objects you would like to display on the screen. You are always able to click to other **parents- or child-related objects**. For instance, an Admin user can remove the Sales Orders from the Account screen but leave their **Detail Lines**. This allows our customers to see what was sold and shipped from the main account screen. By clicking on the Sales Order link on the detail line, they can view the full Sales Order.

The screenshot displays the Microsoft Dynamics 365 interface for the account "Sandia National Labs". The main content area is divided into three sections: "Open Sales Orders", "Open Sales Orders Line Items", and "Invoices".

SALES ORDE...	Account_R ↑	SALESPE...	ORDER ...	ORDER ...	ORDER ...	CUSTOMER ...	BILL TO NAME	WAREH...	N
1412189	Sandia National Lal	1000	8/6/2014	O	S	SAN	Sandia National L...	100	

ExternalKey↑	SALES ORDE...	LINESEQ...	ITEM CO...	ITEM CODE DESC...	UNIT PRI...	QUANTITY ORDE...	EXTENSION ...	DISCO
1412189:000002	1412189	00000200...	CUSTOM	CUSTOM ITEM: UI...	1,904.00	25.00	47,600.00	Y

  

INVOI...↑	BILL TO NAME	Account_R	AMOUNT SU...	INVOICE...	INVOICE DUE...	INVOICE...	PAYMEN...	CREDIT CAR...
0243826	Sandia National L...	Sandia Nationa	80,370.00	7/28/2014	8/12/2014	IN	---	0.00

A callout box on the right side of the screenshot points to the "Open Sales Orders Line Items" table with the text: "Sales Order Line Items From Account Object".

## The AR Invoice

- The AR Invoice is a record that is synced and related to the **Invoiced Sales Order Data**, and **Invoice Payments**.
- The AR Invoice data is useful for identifying unpaid invoices and locating the data, in which the customer needs to pay for the services used.
- The other records which are used in SYNC include the **AR Customer Ship to Tax Exemptions**, **Item Master**, and **Item Warehouse**.
- The **Item Master** is used to create **Microsoft Dynamics 365 Products** by Commercient and links the entire **Item** and **Warehouse** records to the **Product**.
- This gives you the ability to have accurate product data and Inventory availability. In addition, you can **SYNC any Database, table, or view**.

The screenshot shows the 'Active Invoices' table in Microsoft Dynamics 365. The table has columns for INVOICE NO, BILL TO NAME, Account\_R, AMOUNT SUBJECT, INVOICE DATE, INVOICE DUE DATE, INVOICE TYPE, PAYMENT TY, and CREDIT CARD PAY. Annotations on the right side of the table point to specific rows: 'Invoice Sales Order Data' points to the row with INVOICE NO 0226922, and 'Invoice Payments' points to the row with INVOICE NO 0226926.

INVOICE NO	BILL TO NAME	Account_R	AMOUNT SUBJECT	INVOICE DATE	INVOICE DUE DATE	INVOICE TYPE	PAYMENT TY	CREDIT CARD PAY
0226920	FASTENAL COMPANY	FASTENAL COMPA	332.00	1/2/2014	2/1/2014	IN	CHECK	0.00
0226921	SAFEWARE, INC.	SAFEWARE, INC.	938.00	1/2/2014	2/1/2014	IN	CHECK	0.00

### ***Can I limit or control the data that I SYNC?***

Yes. Commerciant has created an open methodology of allowing you to control the filtering of data in the SQL WHERE statement while maintaining the integrity of relationship mapping and efficient syncing methodologies. Within the WHERE you can perform sub-queries, filters, and cross-table and cross-database sub-queries to affect the rules. In addition, you can also map custom tables or views. (Charges may apply).

### ***What else does Commerciant do with Microsoft Dynamics 365?***

Data synchronization is the first step towards a total solution. Ask about these additional modules for SAP B1:

- Quote Processing
- Web-based Product Configurator
- Opportunity and Quote -> Sales Order Conversion
- Products and Price Book SYNC
- Product Record Types
- Cases with Serial Numbers Invoiced and Service Orders
- Opportunity Commissions Calculations based on SAP B1 Invoices
- Automatic SAP B1 Sales Order Email Engine
- Automatic Invoice Email Engine
- Dealer/ Wholesaler Self-Service Portal
- Custom Data Synchronization
- Account Conversion to SAP B1 AR Customer

### ***Company Information:***

Commerciant is a cloud-based company that connects Microsoft Dynamics 365 directly to your SAP B1 system. Our open SYNC Agent works with software such as Epicor, SYSPRO, TRAVERSE, and other ERP accounting systems. Commerciant improves the efficiency of getting CRM, B2B, and B2C eCommerce orders directly into your accounting system in real-time, with all of the associated business rules.
