

Unleash the Power

With the Microsoft Power Platform you can analyze data, build solutions and automate processes across your organization. In fact, you can do more than just solve problems — you can transform your business from the ground up. And with DXC solutions for Microsoft Power Platform your whole business will be able to do it faster, confidently and leveraging best practices.

Meet your challenges as you foster innovation

Data – Provisioning, capturing and storing data in a secure and structured way is complex.

Time to learn – Taking time out of a busy schedule is never easy; training must deliver real value — and quickly.

Ease of use – You need ease of use, but you cannot forsake best practice and strict governance.

Scale – Building a single application may be straightforward, but an enterprise-scale framework is essential for long-term sustainability.

DXC provides the tools and frameworks to meet these challenges and more.

DXC Solutions for Microsoft Power Platform — the technology and business innovation enabler

A simpler, lower-risk way to build a customer-centric framework for the future

DXC solutions for Microsoft Power Platform is our service that unlocks maximum value from investment in Microsoft's Power Platform technology. The service has grown out of our unrivalled experience in helping customers maximise the huge potential of the Power Platform to drive innovation and unlock business value.

With DXC guiding and supporting your people at every stage, your business can quickly learn how to power forward with customer-centric innovation. Better still, you'll quickly have the apps and tools to deliver value across your entire organization.

You'll also be secure in the knowledge that your business-critical applications can be supported from build through to lifecycle management.

With our comprehensive service you're never on your own. From initial ideation workshops, training and product build support, through to deployment, support

and maintenance, the service encourages innovation and provides real business value from the outset.

With DXC solutions for Microsoft Power Platform you can:

- Nurture innovation and disruptive technologies to gain competitive advantage
- Train stakeholders and “Citizen Developers” in how to get started, follow best practice and manage the application lifecycle
- Ensure that your business-critical solutions are supported with SLAs and upgrade services
- Govern your deployments and developments through monitoring tools to ensure you are supporting your business users and adhering to data security best practice.
