FOCUS ON BUILDING DEEPER CONNECTIONS WITH YOUR EMPLOYEES
WHILE A CHATBOT WORKS ON LOW-VALUE TASKS FOR YOU.

Why Now?

Your employees expect you to be **available 24/7**, as your customers do, to get the answers and assistance they need fast, seamlessly, and on their preferred channel.

Moreover, chatbots allow you to engage in more conversations and **collect more behavioural data**, that in return give you a better understanding of whatever is happening within your organization.

You can use this data to further improve the well-being of your employees, **offer better services** to them, increase employee retention over time.

Benefits

BE PROACTIVE

Become more accessible to your employees. The 24/7 support builds trust in the organisation and drives lower attrition rates.

ENGAGE MORE

Be closer to the nerve of your employees and drive engagement even during the most stressful times.

LEARN FROM DATA

Leverage AI to uncover what your employees are asking on a daily basis. Unlock all the conversational data you have stored in siloed HR systems.

Features

KNOWLEDGE BASE

Become more accessible to your employees. The 24/7 support builds trust in the organisation and drives lower attrition rates.

HUMAN HANDOVER

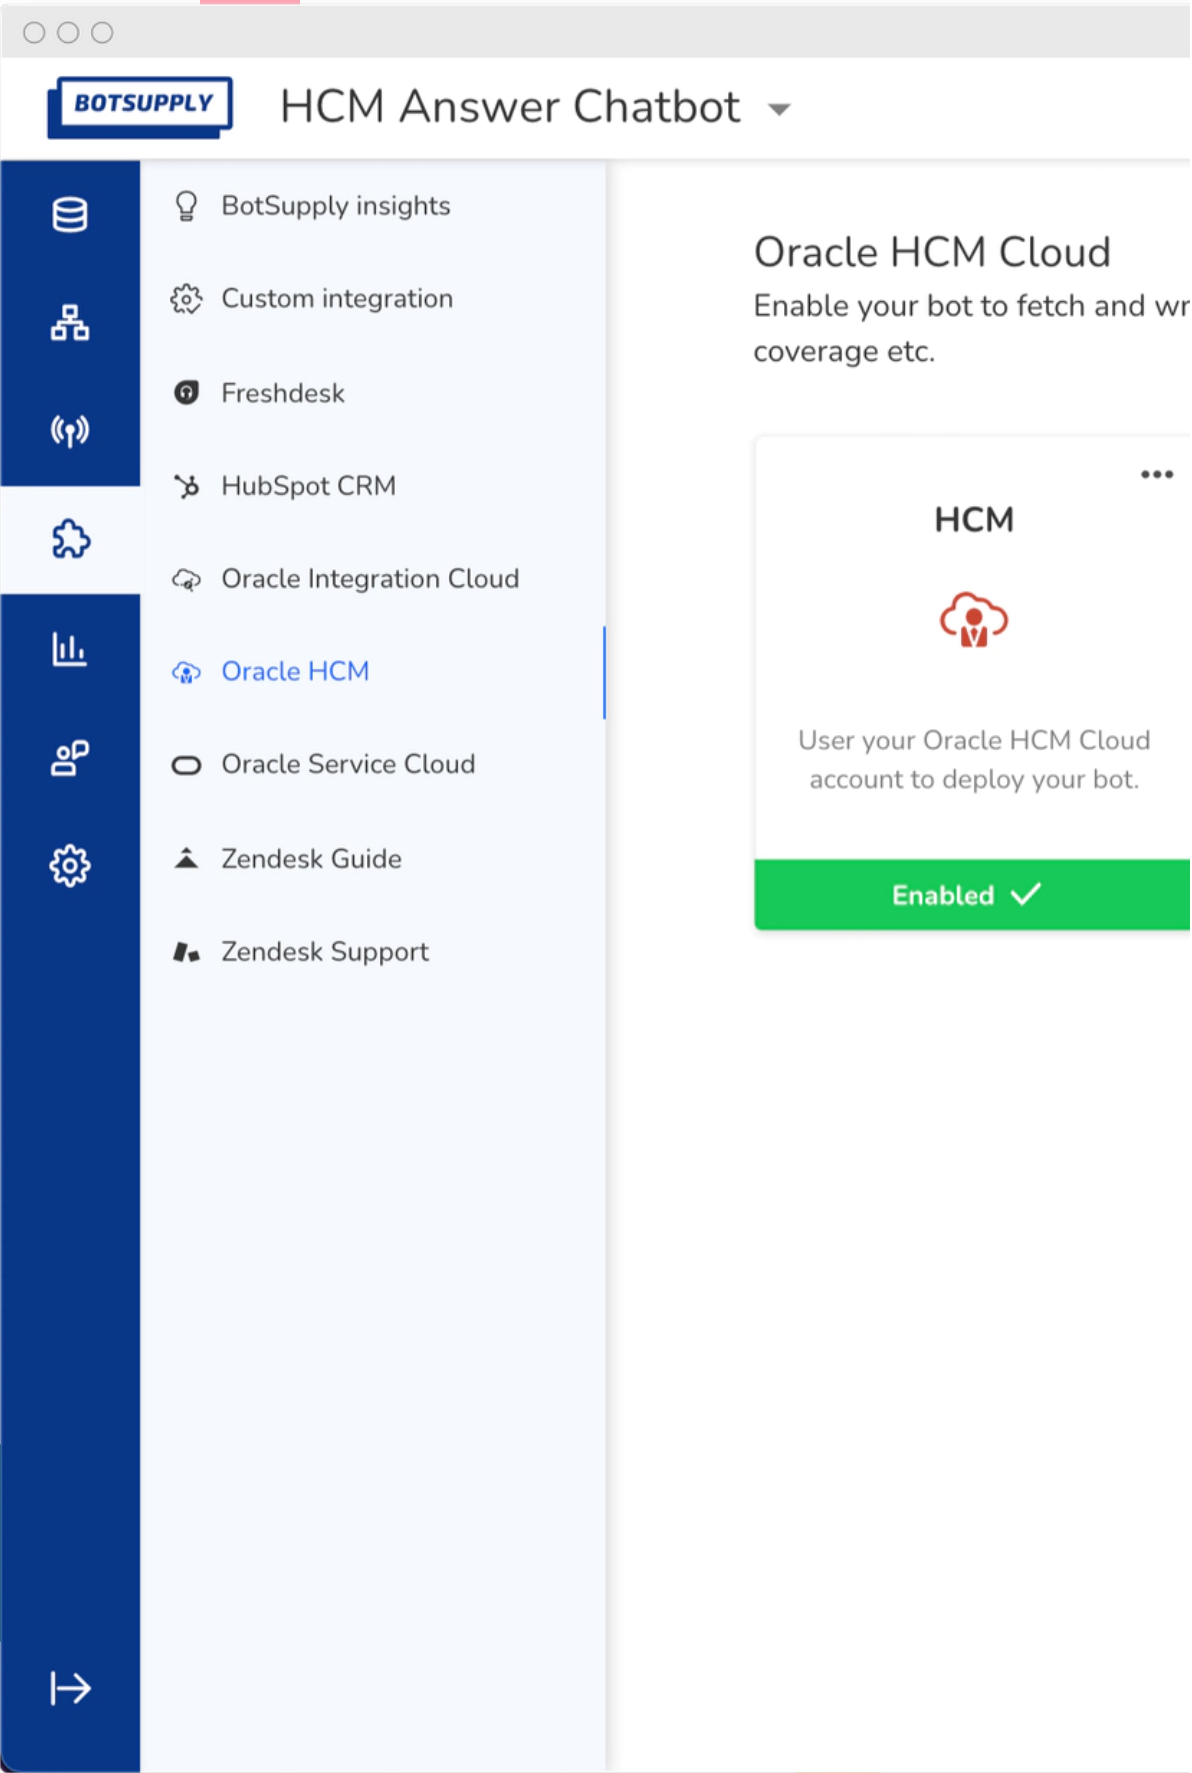

Be closer to the nerve of your employees and drive engagement even during the most stressful times.

EASY TO MANAGE

Leverage AI to uncover what your employees are asking on a daily basis. Unlock all the conversational data you have stored in siloed HR systems.

- 06 Performance Goals
- 07 Pending Workers
- 08 Recruiting Candidates
- 09 Self-service Incidents
- 10 And many more!

OUR MISSION

In a world where people want answers right here and right now, technology has the power to unlock the true value hidden in our conversations.

Our goal is to help you just do that.

BOTSUPPLY

ABOUT BOTSUPPLY

As an Oracle Partner ('Oracle ISV of The Year FY20 in Denmark'), we offer Oracle bots to customers with unprecedented flexibility in each sales cycle in terms of pricing, deployment methods, and data processing options.

Our interdisciplinary and fully remote team embraces hardcore developers, inventive designers, witty copywriters, clever scientists, and passionate entrepreneurs.

We are part of the Oracle for Startups program and yes, we have met Larry Ellison twice.
