

Accessible Healthcare

Australian registered clinicians available online 24/7 via a secure, modern telehealth platform designed for your workforce, for your brand.

What is absenteeism costing your organization?

How are you supporting the primary care and mental health needs of your workforce? Doctors on Demand is an Australian healthcare technology platform for the provision of secure, private video consultations with qualified GPs, psychologists and other allied health practitioners, without leaving the workplace. Includes online prescription review service for repeat medications.

Immediate, Direct, Virtual Employee Assistance

Quality virtual care platform for employees, members, or students.

- Tailored virtual care, anywhere in Australia
- Access to clinicians when and where your employees need them
- Minimise absenteeism for simple acute care or script renewal requirements

Accessible

- DoD Platform offers on demand or scheduled appointments
- Doctors on Demand GPs available 24/7
- Web browser or mobile application, minimum 3G
- Conveniently see a practitioner from home, office or worksite

Integrated

- Platform can be fully integrated with Client Intranet, health apps
- Branded user experience for employee or member cohorts
- Existing clinical partners can utilize the DoD Platform for virtual consultations
- API integration or white label web user interface

Secure

- Optimised for Microsoft Azure
- Embedded video conference service within the DoD Platform
- Patient records safely quarantined from web application
- Dedicated Azure tenancy for large client deployments

Allianz Partners

Darryl Goodhand, General Manager, International Health at [Allianz Partners Australia](#)

“Meaningful health outcomes being generated by our partner Doctors on Demand. Allianz Partners Telehealth, powered by Doctors on Demand helps our student policy holders every day to stay healthy through 24/7 access to Australian GP’s...because they have Allianz Global Assistance OSHC.”

Leading virtual care adoption in Australia since 2015

Patients are demanding greater access to healthcare*

- Only 67% of Millennials have a regular GP; and 55% of Generation Z
- Use of telemedicine is on the rise with 30% surveyed now accessing a virtual care service

Clinical Governance

- Continuity of care provided through My Health Record integration
- Medical certificates require a video consult with Dr
- No Schedule 8 drugs or drugs of addiction

Timely and convenient

- Schedule caters for up to 15-minute GP consultations and variable appointment times for psychology or allied health
- Online booking schedule accommodates on-demand or scheduled appointments 24 hours a day

Virtual Care Platform

Subscription as a Service telehealth platform offering – our clinicians or yours.

- Fast deployment of white-label virtual care website or API integrated service
- 24-month term based on expected number of consultations per month
- Doctors on Demand primary care service for virtual GPs and Quickscripts available
- Partner with existing EAP providers
- Ideal for mental health, occupational rehabilitation, psychology, counselling and return to work services
