

## //Case Study

### Meet the Partner

Since 2001, **Neos-SDI**, a Microsoft Gold Certified Partner propose innovative usage and business solutions in Microsoft Technologies and Cloud infrastructure.

### B2B2C Model

Neos-SDI and Cloudiway worked hand in hand together to achieve a complete migration, including Mails, Drives, and Microsoft Teams for **Neopost**, a global technology provider of digital communications, shipping, and mail solutions. Neopost provides products ranging from physical mail processing systems to digital communications management, as well as supply chain and e-commerce process optimization solutions. From the point of sale to delivery, including associated tracking services.

### Prioritize and Manage Different Migration Workloads

The cloud-based solution Cloudiway can manage mails, drives, groups, teams migration, and more whatever the size and location of the business. Neos-SDI, a trusted partner, worked closely with Cloudiway on several Office 365 projects. They engaged Cloudiway consultancy services and products to achieve a global **Office 365 tenant to tenant migration project**. The decisional process was to find a migration platform with all these capabilities to meet Neos-SDI requirements, which include the migration of Mails, Drives, and the last implemented product of Cloudiway early in 2019, Microsoft Teams.

Collaboration and partnerships are fundamental to improving business outcomes, and we know that «two heads are better than one.» Within a clear and shared goal, Neos-SDI and Cloudiway managed to complete the migration on time.

Presentation

Challenge

## Manage Migration Batches

A great collaboration from both companies from the kickoff to post-migration helped Neos-SDI to have a successful migration process. Strong of a breadth of knowledge and experience in IT services and Microsoft solutions, both teams decided to split the project into two phases.

First and foremost, Neos-SDI has migrated the mails and drives, products that they are quite familiar with. Once phase 1 has been completed and implemented, phase 2 began with the migration of over 200 Microsoft Teams. The migration went very well using Clouidway's fully managed, cloud-based tools.

### Microsoft Teams Migration

Clouidway has proposed the first solution on the market for Microsoft Teams migration early in 2019; it was a perfect opportunity for us to strengthen our partnership and to consolidate the tool.

#### Specific needs for Microsoft Teams:

- Teams
- Channels
- Associated Mailbox & SharePoint Site
- Conversations
- Owners, Members and External Users
- Permissions
- Files
- Emails
- Planner, OneNote
- Teams Settings & Renaming

## Neos-SDI, a Trusted Partner

Neos-SDI, a French tech company working with major accounts in France, is using Clouidway's platform to serve changing market needs.

What Strikes us in this project is how we can work together and achieve a multi migration project at a smooth pace without cutting on timelines and security.

We all know that each migration is different, and Neos-SDI knew they can trust the Clouidway migration tool to ensure the smooth working of all aspects of the migration.

*The choice of the Clouidway solution was a guarantee of success given the experience acquired over many years and the need to migrate Teams that only Clouidway was able to offer on the market at the time.*

*Experience has shown that Clouidway is the ideal partner.*
