

MTM-EasyTime

The first cloud-based software to calculate MTM reference times

**SIMPLY.
QUICKLY.
RELIABLY.**

MTM – TIME TO WIN

mtm-easy.com

Knowing what your production department can really achieve!

Low unit costs, safeguarding delivery capacity, being well ahead of the competition?

If you want to know what your production department can really achieve, then ensure that processes are transparent and calculate reference times using MTM-EasyTime – simply, quickly, reliably and at an affordable price.

With MTM-EasyTime

- Create transparency
- Calculate products and prices
- Reduce unit costs
- Plan human resources needs
- Safeguard delivery capacity and therefore guarantee that you remain competitive

How you can benefit

- Mobile calculations on the shopfloor or using an item list on your desktop
- A cloud-based IT solution, i. e. no special software needs to be installed
- Data can be reused at anytime
- A direct presentation of potential
- A decision-making tool to improve the organizational structure
- Professional advice on realization*

Video
MTM-EasyTime –
How it works...

MTM Reference Time =
the time required for the work system to
complete a task

That's what users say:

„These are orders in savings – inconceivable!“

„I don't know any comparable tool“

„Only required time/reference times offer the chance to change“
