Banks are struggling to keep up with constantly evolving regulation

Challenges

Complying with financial regulation is a lengthy and costly process.

Problems with bank's data can cause delays and discrepancies.

Banks are spending millions on their regulatory compliance.

The regulator is trying to address data issues with new initiatives around granular data reporting.

Ideal Solution

80% of the regulatory rules are standardised, meaning the space is ripe for automation to enable users to focus on the bank-specific 20%.

Technology can drastically reduce costs as it is incredibly scalable.

This solution also reduces time spent by users trying to decipher and implement regulatory calculations.

Desired Outcomes

Using cutting-edge technology, Suade's platform automates the process for banks to meet their requirements.

With banks around the world using Suade's platform and more and more regulatory reports being added constantly, it is already proven to provide a much needed service.

Suade

Technology to prevent the next financial crisis

Cost-effective

- Suade operates a utility platform.
- Leveraging on technological automation to save costs associated with doing the same calculations and analysis manually.

Time-saving

- The Suade platform can process large volumes of granular data rapidly.
- Time spent on manual tasks drastically reduced when using the Suade platform as time-consuming tasks are automated.

Hugely scalable

- The nature of the platform enables users to not be reliant on a single vendor.
- Given the “map once, map forever” notion, it is a seamless process to add modules to the platform.

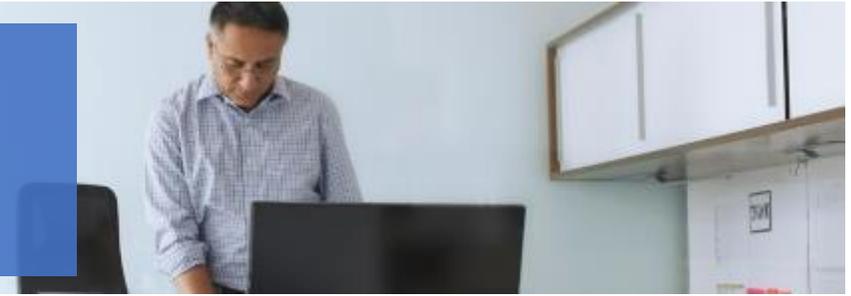

Ease of deployment

- The platform can be deployed on any infrastructure to offer regulation in a box.

“Moving our MLAR reporting to the Suade Platform was a hassle free experience, ahead of anything we have seen from any other vendor. It has also returned valuable information with regards to how we can better manage risks in our mortgage portfolio.”

- Suade Reg Reporting user

Suade + Microsoft Azure

Deploying the Suade platform on Microsoft Azure is a totally seamless experience.

Solution Alignment

Smooth deployment

The Cloud deployment is quick and easy, and fully taken care of, which means you can focus on the important things.

Cloud protection

Prevent data loss due to hardware failures and have piece of mind when deploying on the Cloud.

Unlimited storage

With so much granular data in the Suade platform, you do not want to be worrying about internal storage limitations. With different options for all data sizes, the Cloud can cater for everyone.

Customer Success Story

Tier 1 UK bank

Business Challenge: Find a solution which leverages on the similarities between ALMM, NSFR and LCR liquidity reporting requirements. The bank has spent a large amount of money, time and human resources working on separate liquidity reports which was not creating any additional value.

Customer Testimonial: "Suade's ALMM, NSFR and LCR liquidity package is second to none. After a one off data mapping, we are now able to produce all of our liquidity reports effortlessly. It is an extremely cost-effective solution which is unrivalled."

Win Results

Time Saving:

12 week implementation time.

Technical Advantage:

A web-based platform which houses multiple liquidity reports. Automated data ingestion allows bank data to be imported seamlessly and multiple reports to be generated rapidly.

Commercial Advantage:

The system offers a modular and scalable solution which creates synergies when adding on different reports. Comparison, validation and reconciliation functions become more meaningful as you are able to assess multiple reports.
