

# WORK LESS SHIP MORE

Connect *shipping* with *Microsoft Dynamics 365* to gain efficiencies across your organization.

- Streamline shipping, customer service, and billing processes
- Automatically create invoices or shipments
- Realize cost & time savings
- Rate shop between parcel & freight shipments
- Automated, customizable shipment notifications

Over 5,000 companies trust StarShip shipping software to get their shipments out the door on time and with minimal effort. **Here's How:**

## ERP & eCommerce Integration

Streamline shipping, customer service & billing. Plug-and-play interfaces provide your warehouse with access to orders and invoices. Simply scan the document number from your pick sheet to auto-populate the ship screen.

## Multi Carrier Multi Mode

Ship small parcel (including regionals) and LTL from one application; rate shop both modes with one click or have StarShip auto select the carrier/service based on custom parameters.

## Branded Email

Tired of boring carrier-generated email notifications? So are your customers! Build brand awareness, provide item-level detail and send emails out as shipments are processed.

## Multiple Printing Options

Print shipping labels and documents (including international forms) separately OR for an integrated packing list + shipping label.

## Quote/Rate Shop

Give the entire office the power of rating small parcel and LTL through the convenience of a browser.

## Dashboard

No need to go back to the warehouse to gather additional details. Get instant access to shipment history, metrics and reporting.

## Warehouse Management

Retrieve orders PLUS package > item information defined on a handheld.

## EDI Integration

Our EDI integration to industry leaders provide a full supply chain solution.
