# ULimitByte® Data Backup Service (Windows Version)

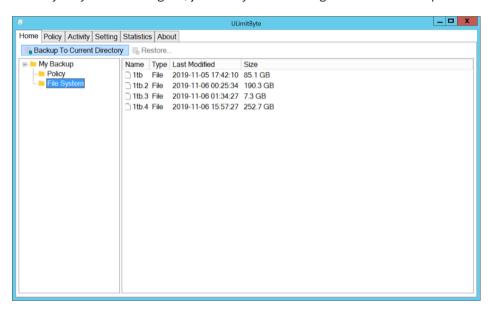

#### Introduction

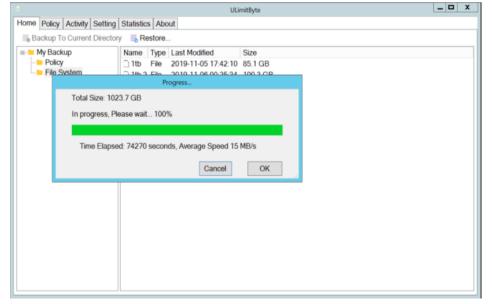

ULimitByte® Data Backup Service provides Light-Weight, High-Availability, Global Dedup, Local & Cloud Data Backup Service to your data:

- Its minimal resource requirement only contains 1 CPU and 1 GB RAM memory;
- It's provided in a standalone application and a background service, which is much easier for deploy and usage;
- It provides the same user interfaces as the Windows Explorer;
- ➤ It contains inline Global Dedup mechanism to help you greatly reduce the expense on local/cloud storage space. You may save 95% storage expense at most;
- It supports local file system directory or cloud storage as the target backup destination. The popular public cloud vendors, such like Azure and AWS are supported;

## Depoly & Usage

As easy as you can imagine, just like you are using the Windows Explorer:

#### **Benefits**

- > Reliable, Stable, High-Availability Data Backup/Restore Service;
- Low-Cost Data Backup/Restore Service;
- User-Friendly Data Backup/Restore Service;
- > Least computing and memory resource consumptions;

### Limits

➤ Backup/Restore Speed with ~32MB/s

## System Requirement

Windows Vista, or higher

Windows Server 2008, or higher
