What is TrinAuto Mfg.?

TrinSoft has extended the capabilities of Microsoft Dynamics 365 Business Central to provide automotive manufacturing companies with an all-in-one business software that will provide their users a single view into all aspects of their organization. This solution will help companies to maximize revenue, increase efficiency, and grow customer engagement through its fully integrated offerings ranging from scanning, receiving, shipping, confirmation, forecasting, financial management, reporting, and much more!

The TrinAuto Mfg. app was one of the first solutions certified as an accepted alternative to the Toyota Shipping Confirmation System (SCS).

Imbedded within our solution is a specific scanning function that can be used on any Android, Apple, or Windows mobile device, which enables your warehouse users to disconnect from a tethered scanner and to work independently of a laptop or PC. The scanning application is completely integrated within the ERP solution, which will save you time and money by eliminating duplicate entry.

TrinAuto Mfg. will enable your organization to have complete visibility to the orders on a pallet, pallets within a trailer, and real-time visibility to order and confirmation status along with notifications and triggers of possible late or delayed shipments.

The TrinAuto Mfg. is built on top of the award-winning Microsoft Dynamics 365 Business Central software, which includes out of the box inventory management, warehouse management, and strong manufacturing solutions.

With TrinSoft being headquartered in central Kentucky, in the heart of the I-75 corridor, we are uniquely located to support and provide our services to many of the tier 1 and 2 suppliers that supply many of the largest automotive manufacturers.

Reasons to Choose TrinSoft

◊ SCS Compliant
◊ Highest level of certifications as a Gold Certified Microsoft ERP Partner
◊ Available as a cloud-based hosted solution that requires no hardware or other infrastructure besides connectivity
◊ Use our unique industry-specific RapidLaunch process to be LIVE in 60 days
