AI-ROADMAP

The AI roadmap is about the identification of relevant AI use cases.
A weighted use case portfolio provides the necessary overview for the upcoming AI journey.

State analysis

In the workshop format, we clarify the most important basics and analyze the technical and technical current situation. The focus is on the challenges and data.

USE CASE PORTFOLIO

In the next step, the use case portfolio is developed and clearly presented. There is an individual prioritization of the use cases based on benefits and effort.

READINESS CHECK

In the readiness check, the selected use cases are closely examined and analyzed. Requirements such as data, systems and processes play a role here.
