# Power BI 2-Week Proof of Concept

A Proof of Concept (POC) engagement from Nous that will help your team create a pilot Power BI solution. In addition to creating a pilot program, Nous will also help create a long-term BI roadmap. Our BI experts will define the POC to suit the complexity of your data landscape, your organization's requirements, and your vision. The POC will demonstrate how to enable your organization to get the most value from your data, create actionable business reports, all while ensuring security and scalability.

## Week 1

- Review existing Database/Data Warehouse and reporting environment
- Understand business reporting and analytics requirements and identify the use cases for POC
- Analysis of possible solution approaches and solution recommendation
- Discuss and define implementation roadmap

## Week 2

- Develop Proof of Concept for identified use cases in Power BI
- Train analysts and SMEs on the creation of powerful visualizations and usage

## Deliverables

- Solution recommendation for business requirements
- Two compelling dashboards for selected use cases
- Power BI Implementation Roadmap
