15.75 hours per user yearly – time saved by reduced downtime

Atos created an effective collaboration solution for a large global enterprise with over 300,000 employees worldwide, seeking to improve team collaboration and create a more unified workplace. Multiple telephony technologies, combined with Microsoft Cloud Connector Edition allowed the connection of Skype/Teams to the company's existing PSTN core, enabling the delivery of traditional external phone calls to Skype/Teams. The rapid migration of 11,000 users enhanced collaboration while minimizing disruption and maximizing call savings. As a result of the success, the company plans to migrate a further 60,000 users. - Multinational conglomerate

Atos delivers Intelligent Collaboration – Teams Calling by using Microsoft tools, leveraging key global voice and video partners to integrate telephony environments with Teams.

Why Atos?

Atos have a **proven track-record of enabling workplaces** through organizational transformation and the integration and support of collaborative technologies. Atos have achieved **7800+ Microsoft competency certifications**, have a longstanding global strategic partnership with Microsoft and are winners of **multiple Partner of the Year Awards**. **With unique service capabilities for both legacy and new way of working, we are the safest partner to transform or integrate voice & video.**

Supporting millions of users

- Digital Workplace Help & Interaction Services enables global support capabilities
- Currently supporting 40M PBX users in traditional communications, 1.2M users on Skype and >600k users on MS Teams
