PowerApps, Flow, & Power BI
The Power Platform!

What are PowerApps, Flow, and Power BI?

These are tools provided by Microsoft's Business Applications group that allow you to develop solutions hosted on Azure or that can run within Office365 or Dynamics365.

We have developed forms based workflows hosted within Office365 that will be used to replace InfoPath forms. We've also built Power BI dashboards that can surface data stored either within Common Data Services (CDS) or from databases or data warehouses. The workflow engine behind PowerApps forms is Microsoft Flow.

What we do?

Custom applications development for **Office365 and Dynamics365**

Business Process Automation and Management

Built **Enkay Employee portal** using Office365, PowerApps and Flow

Free demo or estimate for new business applications development

Test drive our showcase **Receipt App** **here**

Approved **App-in-a-Day workshop** partner for Microsoft

Certified Microsoft's PowerApps Solution Partner

Why Enkay?

We are a certified **Microsoft Gold Partner** for Application Integration.

Our team members are well trained as PowerApps, Flow, and CDS developers and Office365 administrators, and have experience in all aspects of application life cycle management**.**

As business process automation specialists, we have a proven record of successfully helping our customers reduce operational costs, improve efficiency and meet uptime SLAs by recommending changes based on best practices that we have curated over multiple successful engagements.

Our applications development team can help build a custom application for you that can run within your Office365 or Dynamics365 environments.

 *"**We currently have 24hr support with Enkay on issues like these. Once we got them involved they we were able to get it resolved right away**- Sr. Manager, Operations, IT at a large Midwest Insurance Company*
