1 Introduction

1.1 Solution Overview

Preact Address Lookup solution enables users to quickly search and capture an address on any entity in a Dynamics 365 or Common Data Service environment, using the Loqate service or BING Map service.

Note that the Loqate service is the preferred option, as it uses the Loqate service, that is more accurate than the free BING Map service.

Address Lookup

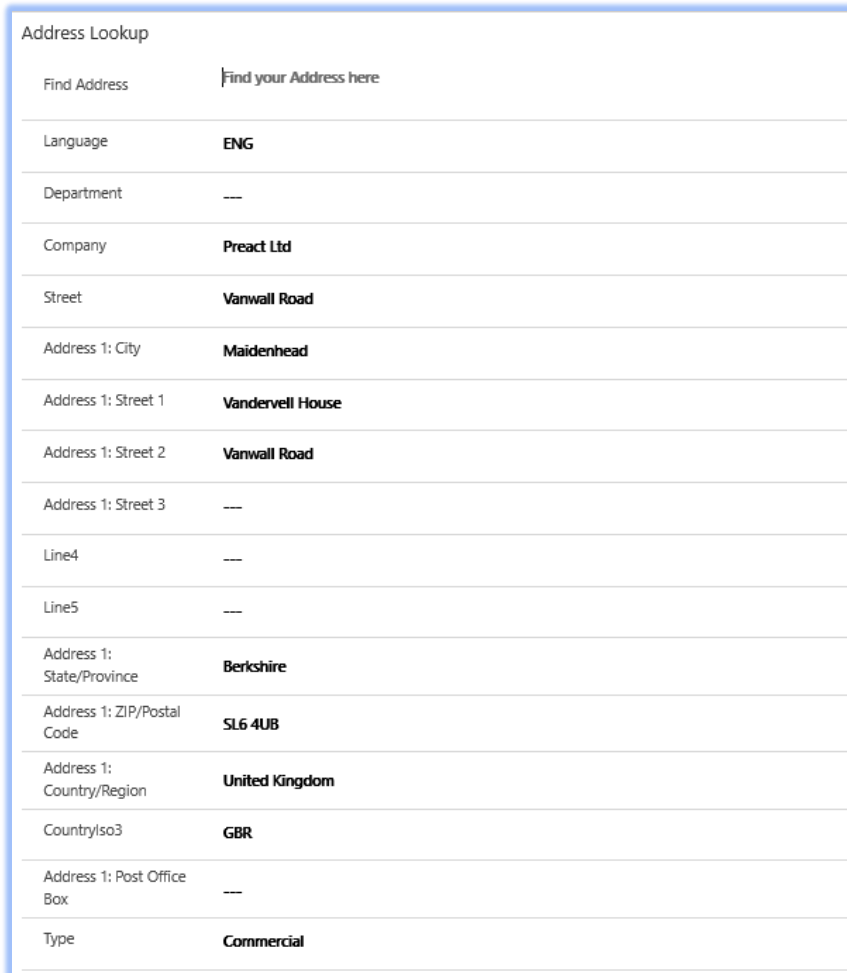

Find Address **Preact** X

Language

Preact Ltd, Vandervell House, Vanwall Road Maidenhead, SL6 4U

Pure Actors Agency & Management, 22 High Street Manchester,

The full address information that could be captured could be seen below:
