

Professional Distancing Technology

System Features

Through 911eye public safety agencies have the ability to securely receive live videos, photos and text messages from the public which will enable them to:

- **Maintain a high level of service while protecting first responders and citizens from potential exposure in accordance with National call guidelines**
- **Document incidents in a secure environment eliminating the need for an in-person response**
- **Provide situational awareness to ensure proper resource allocation and minimize unnecessary exposure to personnel**

The technology is easy-to-use and is compatible with existing systems. Onboarding, training and implementation can be accomplished in under one hour through remote set-up and instruction
