better Customer Insights

Customer Insights Platform

A Banking System Scenario.....(1/2)

Businesses need to have a good understanding of their customers and their changing preferences with time. It is imperative that Banks are responding by taking a hard look at how they manage the customer experience, with increasing focus on mobile and digital transactions. Banks are focusing on developing products and services that address their customers' needs and deliver these in a way that reinforces customer satisfaction and loyalty.

Most banks have multiple touch point with customers through various systems – Banking Center, ATM, Online, Mobile etc. and there could be varied needs of customers – Loans, Credit Card, CSA, Insurance, Wealth Management etc.

KEY CHALLENGES

- How do I give a personalized approach to customer both with offers and products
- How do I get insights into consumer changing preferences
- How effective is my campaign and how is my Leads Conversion
- How should I price my product and to which segment
- With Multiple Touch points and different Data Silos- How do I get a broad view of consumer spend
- Rising expectations of customers - high degree of convenience and personalization
- How effective is my service

A Banking System Scenario.....(2/2)

With Multiple Customer data sources and large product pool, How should one deal with wealth of data of customers to get a unified view of a customer, their Preferences and Lifetime spend of consumers. What kind of KPI's that will help them to measure the success of sales, marketing strategies.

KPI'S AND BUSINESS MEASURES

- Finding Churn score and developing Action plan to address the same?
- What kind of Customers/ regions should we run Campaigns to?
- How effective are my campaigns?
- How is my Customer Loyalty and their satisfaction?
- What is Customer acquisitions costs as a percentage of sales value?
- Calculating Customer Lifetime value

Customer expectations are growing

91%

of consumers are more likely to shop with brands who recognize, remember, and provide relevant offers and recommendations. ¹

81%

of buyers want brands to get to know them and understand when to approach them and when not to. ²

In an Enterprise, multiple Customer touch points collect Customer data resulting in inefficiencies...

Enterprises collect multiple data feeds from customers across various touch points through the marketing, prospecting / selling and customer servicing or after-sales servicing business functions. Often, using such data, coming from multiple sources, in an isolated or disconnected way.

About Infosys Solution for better Customer Insights

Market has become customer centric – Providing service to customers in the best and fastest possible way determines the success or failure of a product or service.

“**Customer insight** is the understanding of your **customer**, based on their buying behavior, their experiences with you, their beliefs or needs. **Customer insights** go beyond raw data or research, it is a multi-view of your **customers** derived from a strategic analysis of qualitative and quantitative data”

How Infosys customer insights helps organization

- Helps you understand your customers
- Helping you make better decisions about how, when and what to sell them.
