

## Harness the Power of Data and Reporting

Report Bee was created with the vision to get useful and actionable insights from data in schools. There is a real need for simple but powerful data visualizations that can make information consumption a pleasure. Education is undergoing rapid changes and a side effect of this is that teachers and school managements now need to handle a lot of data. **Our goal is to gain useful insights from the data and present the findings in meaningful reports for quicker and better decision making.**

The **Data Recording and Assessments Engine** of Report Bee not only captures academic performance data but has also developed tools to capture qualitative data like co-scholastic, health records, attendance, etc. Once the data is captured, **the Analytics Engine** provides instant real-time analytics on the academic performance of the school. **The Reporting Engine** generates instant student and class report cards that can be viewed online or downloaded as PDFs. These engines create a feedback loop along with our **Communication Engine** for the school management, teachers, students, parents and other relevant stake holders, facilitating better and a more efficient teaching learning process.

## Our Milestones
