

Awara Corrector for Microsoft Dynamics 365 Business Central

What is Awara Corrector

Awara Corrector is a tool that allows you to correct posted entries in dimensions, add or delete unwanted entries without cancelling your entry.

This tool is highly required by financial professionals that use Microsoft Dynamics 365 Business Central on the regular basis and need to eliminate efforts on posted transactions.

Intended for

The tool is intended for all companies that have accounting operations within Microsoft Dynamics 365 Business Central.

Normally it is used by finance professionals, accountants, financial controllers or analysts.

Why Awara Corrector

The tool makes everyday operations within Microsoft Dynamics 365 Business Central easier and faster. There is no need to cancel and then create new documents or transactions that were formed by mistake.

In case there was an error, Awara Corrector allows you to just correct the existing dimension and continue working. This saves time and efforts of finance professionals and enables them focus on more important and less routine tasks.
