your mobile device

**Automate**

**3** Get detailed reporting  
on who was onsite

# Benefits

**EVA Check-in is a simple solution that requires no set up or hardware. All you need to do is print posters or display a QR code on a screen. It has all the security and data privacy settings you need, and a price point that makes sense.**

- No handwritten guest registers, shared pens, or systems that aren't privacy-focused.
- Save on administration time. Your guests can check themselves in fast with no queues.
- Capture the data that makes sense for your organisation - from car registrations to student IDs.
- Built-in reporting keeps you up to date with check-ins and makes it easy to find who else was on site at any time.
- Manage multiple sites and use zones to organise and track movement within larger sites.
- Get alerts to track when you have too many people on site.
- It's simple to get started - nothing to install, and easy for guests to use.
