

# Microsoft Dynamics 365 Business Central Slovenian Language (Slovenia)

USER GUIDE

Last updated: 20. April 2020

# Overview

Let your Slovenian employees use Microsoft Dynamics 365 Business Central in their native language. With Slovenian Language for Slovenia application extension you can easily switch between English and Slovenian languages and work easily in either of the two languages.

## How to Verify Language Installation

Open **Extension Management** and check if extension named 'Slovenian language (Slovenia)' is installed. If not, please contact your partner.

## How to Change Language into Slovenian

To change application language into Slovenian, open **My Settings**, and choose 'Slovenian (Slovenia)' for the **Language**.

To display dates and numbers according to Slovenian format, choose also 'Slovenian (Slovenia)' for the **Region**.

Click OK to apply and close **My Settings**.

You should see now Dynamics 365 Business Central in Slovenian language.
