DISCOVER, ASSESS, AND PROTECT YOUR DATA
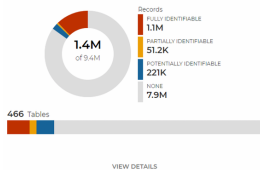

Datahunter
### by Apption

Apption's Datahunter is a perfect compliment to cloud migration and other data management processes.

Datahunter's advanced ML data discovery and PII identification capabilities allow organizations to understand their structured and unstructured data like never before. Everyone interacting with your data gains a clear understanding of risk, actions that require immediate attention, and the ability to ensure the continuous integrity of your data for all your business needs, including artificial intelligence and machine learning.
