

GO-SEPA. Automated bank payments solution

Bank payments in Euros according to the common European standard

Joint area of payments in Euros, i.e. SEPA (Single Euro Payments Area), where the bank operations (local, international transfers or direct debits) are performed in accordance with common standard (ISO 20022). SEPA has simplified the bank payments for the legal entities and individuals. Upon making payment orders, individuals and entities use the same payments form for the local payments as well as for the international ones.

GO-SEPA – A SIMPLE AND HANDY SOLUTION FOR BANK PAYMENTS

GO-SEPA is a simple and convenient way to pay in Euros within SEPA countries according to the common standard.

GO-SEPA benefits:

- The bank payments within the Euro zone will be made easily and conveniently in accordance with the set requirements.
- Manual work is reduced significantly due to the use of handy tools – the information on payment code and recipient's address will be added to the payment file. Also, you will be able to:
 - Generate the payments (via batch jobs) according to the periodicity preferred by the user;
 - Perform different types of payments;
 - Store the exported payments in the selected catalogue;
 - Import the generated XML files from the Dynamics 365 FFO / AX into the bank, and import the performed payment lists from the bank into the Dynamics 365 FFO/ AX.
- Promptly receive the information about payments' status. Conveniently monitor the balance, easily receive the bank operations reports and statements.
- The data is transferred in XML format as required by ISO 20022 standard.

COMPARE GO-SEPA AND MICROSOFT D365 FFO STANDARD FUNCTIONALITIES
