MAIN-TOOL

TECHNICAL ASSET MANAGEMENT

• Create objects
Create all types of objects.
The basic package contains 1000 objects.

• Sector-neutral object management
In MAIN-TOOL Technical Asset Management you can manage all possible structures, hierarchies, process keys, circuits, fleets, building structures, It environment, etc.

• Explorer view
The structures can be clearly arranged in an Explorer view.

• Up to 20 levels

• Technical specifications
Using dynamic data fields, they can store individual technical data for each object.
