pimics

All your product information
neatly in one place

Still **wasting time** rewriting **product information** manually?

PIMICS makes it easy to enter, manage and transfer information about the products you sell.

You can manage all product data in one system and make edits in bulk **saving you time and money**.

After each edit your ERP, e-shop or other sales channels are automatically updated meaning you always **use the current version, without errors**.

Save hours on importing and exporting data.

Transferring data between you and your partners all over the world is much easier as PIMICS ensures your data will always follow international standards like BMECat, ETIM or eCl@ss.
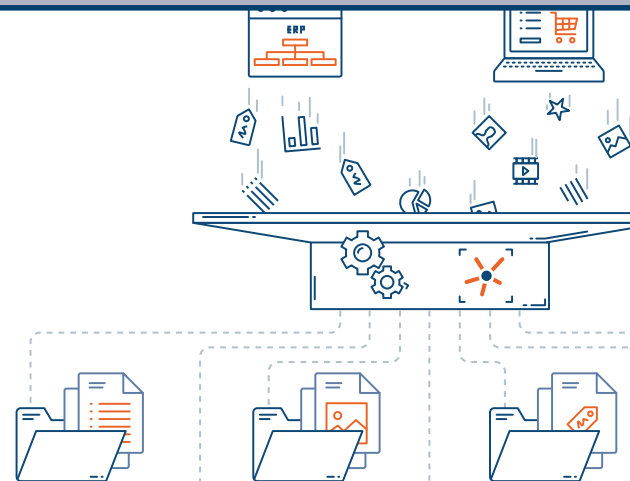

You can quickly start selling on **Amazon or eBay**.

A **200-page printed catalogue** can be prepared in just a few days.

Integrated MDM functionality prevents erroneous data inputs and guarantees a high degree of data quality.

What Is PIMICS?

PIMICS is a tool that makes product information management easy. It allows you to store and manage all product data in one place and in compliance with **internationally recognised standards**, which facilitates data entry and data transfer between you and your partners all over the world.

How Can PIMICS Help You?

It considerably speeds up data entry and improves accuracy and completeness (the Master Data, images, drawings, captions, texts or structure) for clients who have several suppliers and thousands of products. PIMICS automatically edits and completes the data imported by suppliers based on the created rules saving you hours of work.

Any edits made to the product data (such as foreign language localization or editing the specification or image) only has to be done once. PIMICS can be connected to your marketing and sales channels meaning the data will be updated automatically at the same time.

This will ensure that you are always working with the most up-to-date data in the correct format. Exporting and transferring data, as well as preparing new product offers, can be done in just a few minutes.

How Is PIMICS Deployed?

If you use Microsoft Dynamics NAV or Dynamics 365 Business Central ERP system, we will deploy PIMICS as a module and have it operational within days.

Pimics is Certified for Microsoft Dynamics Nav (CfMD) by Microsoft and it is available as an extension on Microsoft's AppSource
