

Automate the collection of information and documents.

Get customers, vendors and employees on board with less waste and more haste.

LESS FALLING THROUGH THE CRACKS. MORE BUSINESS DOWN THE TRACKS.

Minimise the potential for lost customers because of incomplete information or sheer frustration.

LESS BACKWARD AND FORWARD. MORE ONWARD AND UPWARD.

Fewer steps and fewer delays mean everyone can get on with what they need to.

By reducing human error and oversight, you can turn weeks into days and hours into minutes.

COLLECT INFORMATION WITH LESS MESS AND MORE FINESSE.

Step 2: Customer, vendor or employee (let's call her Mandy) enters information

by hand (often leaving out crucial details). **Step 3:** Mandy gathers and scans supporting documents.

Step 4: Mandy emails the form and supporting documents back to Manuel.

Step 5: Manuel reviews the information, trying to decipher Mandy's handwriting.

He realises Mandy didn't complete everything, so he emails her back again to request the missing information. **Step 5a:** Manuel waits. Again.

Steps 6+: Repeat of steps 2 – 6 a few times. **Step 12:** Mandy finally supplies full and accurate information.

with various third parties. Anyone can (and does) make mistakes

Step 13: Manuel verifies the information

at any point. All told, one person's In other words: slow, unreliable,

Step 1: Mandy goes online to supply information (much of it already prepopulated)

and signs.

Step 2: It's automatically verified. Done.

information can take weeks to collect. frustrating and potentially costly.
