

# AtBot

## The Premier Bot-as-a-Service Platform for the Microsoft Cloud

AtBot is a no-code, bot-building platform powered by Microsoft Flow and Microsoft AI that integrates seamlessly into your Office 365 environment.

### WHAT WE OFFER

#### Do More with Bots

A bot lets users have a simple conversation to get their work done faster. With AtBot, citizen developers with no programming experience can create or improve upon an intelligent bot that integrates with their enterprise services in hours versus weeks or months.

#### Intelligent

Tight integration with Microsoft AI means your bots will have real brains! AtBot makes it simple to incorporate AI into your everyday workloads.

#### Connected & Scalable

The mystery of connecting to external services in your enterprise bot are solved by training your AtBot bot through Microsoft Flow. With hundreds of connectors, the possibilities are endless!

#### AI Within Reach

With native deployment to Microsoft Teams, SharePoint, or any other web application, AtBot brings conversational user experiences to the places your users are already getting work done.

# AtBot

## KEY USE CASES

### HUMAN RESOURCES

Simplify recruiting, onboarding, benefits elections, employee relations, and enterprise support.

### CUSTOMER CARE

Centralize your CRM, ticketing system, and feedback mechanism, all while maximizing self-help and -support.

### PRODUCT DEVELOPMENT

Streamline project management, the development lifecycle, incident logging, and involving your customers.

### SALES & MARKETING

Facilitate content development, social media marketing, and taking the pulse of your customers.

### LOCAL GOVERNMENT

Improve resident tracking, response to FAQs, and communications.

### MAKING THE BOT EXPERIENCE MORE HUMAN

With Microsoft's Language Understanding Intelligent Service (LUIS), AtBot can take everyday human language and connect it to the correct information, business process, or support network. No more guessing.

### SIMPLE PROCESS AUTOMATION, AVAILABLE ANYWHERE

Microsoft Flow is the logic engine behind AtBot. Flow's easy-to-use interface and 150+ third-party connectors give you the power to connect multiple systems accessible through a single, standard access point: AtBot. Desktop or mobile. Flow is included with most Office 365 subscriptions.

### HIGH-QUALITY ANSWERS TO REAL QUESTIONS

AtBot integrates with QnA Maker, Microsoft's question-and-answer service that revolutionizes knowledge management. No more searching for hidden information. Plus, shrink the number of help tickets and phone calls.

### YOUR BRAND, YOUR BOT(S), YOUR RULES

With AtBot's Admin Portal, create branded bots for various uses, control who can access which Skills, and add a bot to your public website. Do all of this within a matter of hours rather than spending months to develop it yourself.
