

# enHanced Labels

Labeling Solution for Microsoft Dynamics 365

enHanced Labels extends the functionality of Microsoft Dynamics 365 and bridges the gap between extracting system data and generating labels via external labeling software, while offering an almost limitless data set for label creation.

## Label Creation Made Easy

enHanced Labels is an add-on solution for Microsoft Dynamics 365 Finance and Supply Chain Management that provides a framework for label printing against virtually any data set in Microsoft Dynamics 365.

Moreover, once data mapping is complete, labels can be generated from any screen in Dynamics 365 where the data set is listed as primary. Furthermore, the mapping tool inside enHanced Labels allows users to associate data, and even X++ methods, without the need for a developer.

enHanced Labels integrates with other third-party solutions such as BarTender or Loftware. Labels can be created in advanced and versatile formats with nearly any required data. In addition, labels can be designed for various purposes, such as customer compliant UCC-128 (GS1-128) barcoded shipping labels, inbound receiving labels, product labels, and more.

### enHanced Notes at a Glance

- Print labels from virtually any Dynamics 365 screen
- Choose your data set and map to label fields
- Call X++ methods for dynamically mapped data
- Control which labels are created based on any criteria (i.e., custom shipping label for customer ABC)

### What are the Benefits?

- Eliminates the need for downstream customizations when new information is needed on your labels
- Keeps your investment in labels already created in third party labeling software
- Mapping types: tables and fields, table methods, class methods, static text, and user input
- Leverages the advanced filter/sort feature in Dynamics 365 to query and join required data

## About enVista

enVista is a leading global software solutions and consulting services firm enabling mid-market and Fortune 100/5000 manufacturers, distributors, retailers, and healthcare providers to drive customer engagement and revenue. enVista is a Microsoft Gold Certified Partner, specializing in the Microsoft Dynamics 365 suite of products, including Finance, Supply Chain Management, Sales, Marketing, Field Service, and Customer Service, the Microsoft Power Platform, including Power BI, PowerApps, and Power Automate, along with many other Microsoft Azure services to support Business Intelligence, Custom Application Development and Integration Services.
