

#### Who are we?

- Founded by Security Professionals from industries such as Critical National Infrastructure, Government, Military, Financial and Telecommunications Sectors.
- Key strength lies in understanding organisations security operational needs and security use cases. Cloud focused and intent on building cyber security solutions to meet our customers demands and requirements.
- Utilizing Innovative and cost efficient solutions to combat the growing cost and complexity of Cyber Security.

# What is SOC & Security Information and Event Management

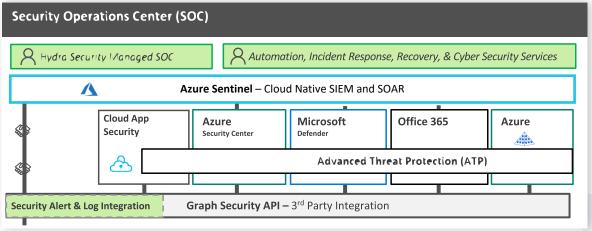

Security Information and Event Management – Gartner (Gartner, 2019) defines the security and information event management (SIEM) market by the customer's need to analyse event data in real time for early detection of targeted attacks and data breaches, and to collect, store, investigate and report on log data for incident response, forensics and regulatory compliance. SIEM technology aggregates event data produced by security devices, network infrastructure, systems and applications.

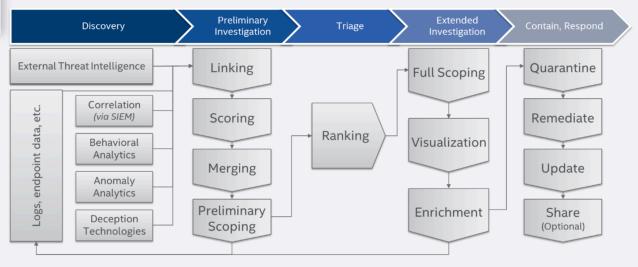

### **Azure Sentinel Managed SIEM**

#### **Process**

## **Azure Sentinel Managed SIEM**

- A cost-effective, cloud-native Managed SOC Service with predictable billing and flexible commitments - Pay for the data you want and flexible subscriptions for expertise
- 24/7 Protective Monitoring
- Trained and Accredited Security & Cloud Expertise
- Pro-Active Threat Hunting
- Security Orchestration Automated Response
- Custom use cases & continuous fine-tuning of existing alerts, playbooks
- Monitor availability of all security log sources (cloud or on-premises)
- Integration with customer organisations ticketing system
- Utilise Microsoft Azure and On-Prem "SIEM-less" integration for POC testing and value
