IntelliSpace 365

REVOLUTIONIZE YOUR FACILITY MANAGEMENT

IntelliSpace 365 is a purpose built next generation solution for residential, commercial and mixed-use property management firms looking to digitally transform their business. Built on the Microsoft platform it leverages the powerful capabilities of the Microsoft Intelligent cloud and industry leading business application Microsoft Dynamics 365 to break down silos created by traditional solutions empowering property management firms to better design, manage and service their properties. With IntelliSpace 365 you can:

- Create dynamic templates for common properties to aid in creation and organization

- Track tenant/customer relations for properties, facilities and serviceable objects

-Track utility meter consumption to facilitate

- Utilize Microsoft Dynamics Connected Field Service to associate your properties and facilities to aid in work order management and technician dispatching with detailed service histories

-Better optimize technician time by seeing upcoming service activities and combining them on the same deployment

IntelliSpace 365 Benefits

BETTER ENGAGE & UNDERSTAND YOUR CUSTOMERS

Build customer trust by giving tenants access to all of the billing, consumption and maintenance info from one place. Create a seamless tenant experience that enables them to make important requests with a self-service tenant portal.

EMPOWER YOUR PEOPLE

Empower property service technicians with a 360-degree view of your customers and real-time guidance to improve resolution time and earn customer trust. With IntelliSpace 365 you get easy-to-follow process-driven workflow to quickly and easily deliver meaningful experiences for key roles within your organization.

OPTIMIZE YOUR OPERATIONS

Facility management - Create and organize different types of both shared and wholly-leased facilities to track maintenance, upgrades and billing across your suite of properties.
**Utility management** - leverage dynamic meter creation to assign and track readings of utility or use meters for any of your properties to keep detailed logs of usage, payment history and outstanding costs. Track usage to discover overages or potential issues before customers be aware
Work order management - get real-time updates on Iot devices to better track issues, respond to customer needs and track preventative maintenance.
Provide end -to-end visibility of your business through data-fueled insights. .

SMART BUILDINGS

With IntelliSpace 365 you can transform your organization and shift to a proactive, predictive service model that reduces cost, predicts equipment failures, accelerates repairs and recommends systematic prevention measures. Drive innovation with an application that is easy to tailor, extend, and connect to other apps and services you already use.

Our History

A team of industry experts and technology savvy professionals founded Domain 6 in 2017. After extensive experience in multinational organizations such as Microsoft, CGI, PwC, and other systems integrators and independent software vendors, these leaders came together to fulfill a dream of enabling real estate firms with technology.

About Us

OUR MISSION

Enable real estate firms to make the best use of technology to drive organizational insight and support their growth.

OUR VISION

Deliver business and transformational solutions for real estate organizations using Microsoft technologies worldwide.

OUR CULTURE

With our mission and vision in mind, we want to build a team of technology and industry experts that support clients' success. Our culture focuses on three major pillars: service excellence, innovation, and industry expertise.
