OVERVIEW:

We understand the challenges that you are trying overcome. You want to modernize your data management structure, but aren't sure which route is the right one for your business.

ATMOSERA EXPERTISE:

Azure is the cloud that knows SQL server the best, and as a 100% Azure-dedicated MSP, Atmosera has the platform experts to help your business migrate to the cloud and run SQL workloads on an industry-leading database engine while taking advantage of cost-saving opportunities.

WHY ATMOSERA:

Atmosera is here to be an extension of your team, helping you migrate your SQL Server structures to Azure for a cost-effective, low-risk journey to the best cloud environment available.

Explore our complementary Azure Migration Assessment available to you prior to engagement in a free migration!

Atmosera SQL to Azure Expertise

As an expert MSP specializing in Azure, we are able to provide the performance benefits and environment value your business requires:

Reduced costs in Azure compared to an SQL environment

Better performance with decreased TCO

Azure PAYGO Pricing through migration of SQL licenses

Azure Security Center for constant threat detection

Complete compliance in the Cloud including HIPAA, PCI and NIST

Azure SQL Database and Azure Stack for extension of services and capabilities across your full infrastructure

→ **Experience these improved Azure performance benefits through a SQL migration with Atmosera**
