

Windows Virtual Desktop

Enable a secure remote desktop experience from anywhere

Flexibility and **scalability** for your virtual desktops

Easily delivered to all employees

A personal Windows 10 desktop that is always up to date and available from any device

Enables device flexibility and creates the opportunity for your employees to bring their own devices

Gives access to the Office 365 ProPlus package optimized to give the most productive experience to the user

Enables automatic scalability

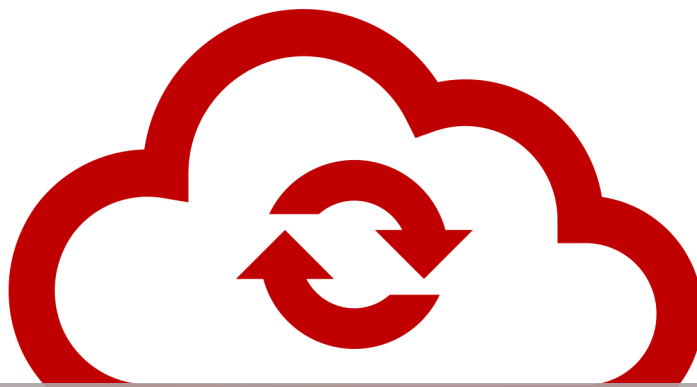

Introduces new technologies that improve logon-time and application start

Introduces new technologies that improves security

Save money, quickly **adapt your external desktop** to users and **deliver new applications** directly to your employees' Virtual Desktops

You can introduce a new and modern work environment with Windows Virtual Desktop where your employees can work securely across devices and away from the traditional office desk.

Our Proof of Concept is based on Microsoft best practice and comprehensive customer experience

Our Windows Virtual Desktop Proof of Concept consists of the following:

- 1 Firstly, you will receive a presentation of the Windows Virtual Desktop concept in a preliminary workshop. The preliminary workshop is followed by a mini analysis of your existing IT-environment
- 2 Secondly, a minimum Windows Virtual Desktop setup takes place. This minimum setup makes sure that you gain the necessary insight into Windows Virtual Desktop and its business value
- 3 Lastly, a concluding workshop is conducted, where the Windows Virtual Desktop experience is discussed, your questions are answered and next steps are discussed.

Windows Virtual Desktop

Case - Herlev Municipality

Implementation of a **Modern Workplace** with **Windows Virtual Desktop**

By implementing
Windows Virtual Desktop,
the municipality:

Reach a higher degree of
flexibility

Secure financial savings

Continuously adapt
external desktops to their
employees' evolving
needs.

ProActive has enrolled a modern digital workplace for Herlev Municipality following their soon to come relocation to new office buildings.

Herlev Municipality needed a solution that serves virtual desktops to their employees without compromising their need for a high degree of IT security.

With the help of Windows Virtual Desktop, Herlev Municipality obtain a new and modern workplace where employees can work across devices regardless of their physical location.

Additionally, Windows Virtual Desktop ensures that compliance and IT security continue to live up to Herlev Municipality's security requirements.
