LOGISTIA

How it works

Route optimization

Import orders with addresses and dispatch the drivers on the most efficient route with constraints like delivery window requested by client.

Automation

Import, assign and deliver and fulfill orders in minutes. Automate manual work.

Notify customers

Keep your customers informed about the status of their order. If it’s on the move, they will know.

Optimized for customer happiness

LOGISTIA

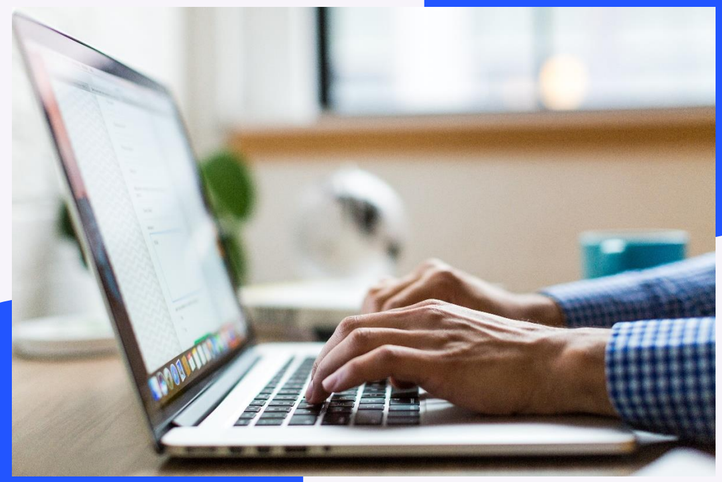
Why LOGISTIA

Dispatch faster

No need for printing delivery routes and customer details. Your drivers will be headed in the efficient direction daily.

More deliveries

Logistia can help you deliver more orders with the same resources.



LOGISTIA

Competitive Advantages

E-commerce integration

shopify

Magento

WOO COMMERCE

Easy route generation

Logistia considers start/end points, driver schedule, car volume, client delivery window or traffic elements to generate routes in seconds.

Live updates

Customers know where their order is, so they know to plan their day around the delivery ETA.

Mobile apps for drivers

Drivers can access only their own route from a mobile device to drive, contact customers and close orders
