

# Unlock your door with your smartphone

It's smart, powerful and efficient.

Let's get started with the brand new tedee lock!

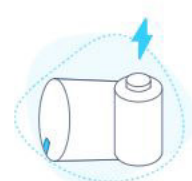

## Benefits

Why tedee?

### Convenience

Control your door lock with a smartphone... from wherever you are. Expecting visitors? Share access to the lock or unlock the door remotely. Hands full of shopping bags after a shopping spree? The lock will let you in... hands free!

### Efficiency

You don't have to buy and replace any batteries! Thanks to the lock's ultra-low energy consumption and a powerful rechargeable battery you can operate your lock for months... then recharge it overnight.

### Design

Enjoy the sleek eye-catching design that suits any apartment and office entryway. It's small, smart and powerful.

## tedee set

The complete tedee product package contains the smart locking mechanism, a certified Gerda lock cylinder for your existing lock, the Wi-Fi-enabled remote bridge and required accessories. You will also need to download the tedee App.

SMART LOCK

ACCESSORIES

## Full control in the tedee app

### Notifications

Pick the notifications that you want to see and stay up to date. You'll know everything about what's going on with your lock.

### Controlling your lock

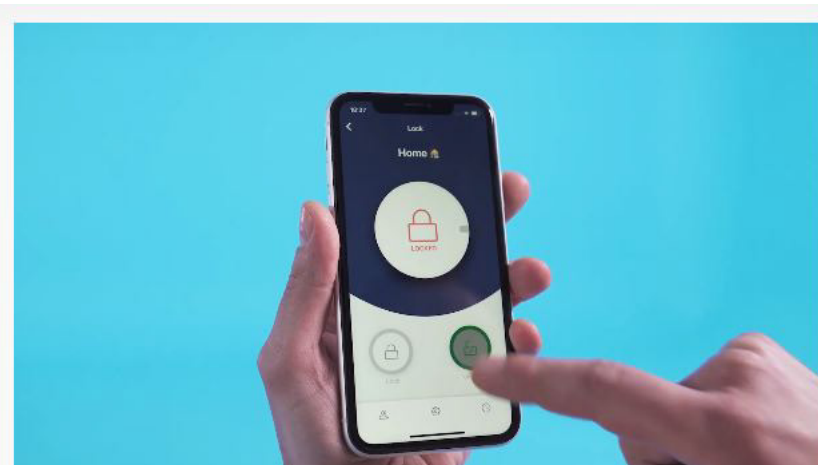

Control the lock using the app from wherever you are. Check if the door lock status or lock and unlock the door with a single finger tap.

### Door lock history log

Check who unlocked and locked the door and when. The log stores details about everything that's been going on with your lock. You can access the log from anywhere and maintain full vigilance over access to your home or office.

### An all-in-one app

Manage as many locks as you like at the same time from a single app.

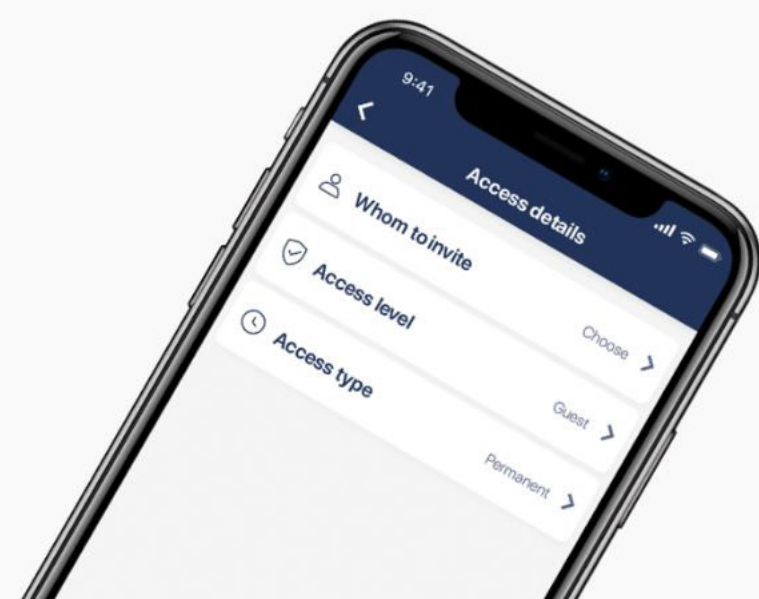

## Keep your keys in your smartphone or Apple Watch

Looking for your keys? That's a thing of the past! Install your tedee lock, pair it with the app and unlock your door with a single tap on your smartphone or Apple Watch.

## Open your door contactlessly

Getting in with hands full? With automatic door opening feature you won't have to look for your keys or even pull the smartphone out of your pocket. The lock will open the door for you as soon as you get close.

## Share digital keys

Use the app to easily share digital keys to your lock – both permanent and temporary ones. You'll never lose or copy another key in your life!

## Three access levels

You have full control over your digital keys

### Owner

Has access to the lock's full feature set and can manage other users' access permissions.

### Administrator

Has access to the lock's full feature set and can manage guest access permissions.

### Guest

Can open and lock the door based on granted access.
