

# Transition your telephony to the Microsoft Cloud

CloudUCX™ utilises Office365 and Direct Routing to deliver a hosted Microsoft Teams solution for all of your internal and external communication.

CloudUCX™ includes migration to Microsoft Phone System, a competitive Voice Calling Plan, responsive 24/7 support, an inclusive headset or handset for every user and unlimited access to our end-user Adoption Portal.

- Quickly enable Cloud Voice in Office 365
- Remove barriers of migrating away from legacy PBX
- Global Reach in countries where Microsoft calling plans are unavailable

## Better for Business

- Achieve significant cost-savings in real estate, travel and telecoms
- Increase productivity and connect to your customers & supply-chain faster
- Improve collaboration and team effectiveness

## Better for IT Department

- Start from a Pilot and easily transition to a production environment
- Flexibility of Direct Routing with convenience of Microsoft Calling Plans
- High availability, reporting & 24/7 support

## Better for End Users

- Simple, intuitive and user-friendly experience
- Unlimited access to adoption portal
- Inclusive market-leading headset

**"We have an extremely complex infrastructure and tried to move to Microsoft Phone System in the past over a period of months. With CloudUCX we were making PSTN calls successfully within weeks"** – Mike Whyment, University of Aberdeen
