WHAT YOU SEE IS WHAT YOU GET

With our learning portal, your employees can become more self-reliant when they start using new it-programs. You decide which courses should be visible, so that the portal is adapted to your specific needs.

STREAMLINE YOUR TRAINING

Offer your employees relevant and easy-to-understand training in the IT tools they need in their day-to-day work. The courses will give them a boost of competence at their own pace and in the order that suits them best.

WE MAKE IT EASY

Our solution has Single Sign On, so there is no user management on your part. Just click on the link and all employees have access. Easy as it gets.

EXAMPLES OF COURSES

Teams is the new collaboration tool from Microsoft. We can help your implementation happen quickly and without too much frustration. The course give an introduction to the program, and at the same time provide great tips on how to use it.

OneDrive for Business is smart for handling your personal files. But what benefits can it provide the individual and how to get started easily? We can teach your employees and ensure that everyone meets your desired data security.

SharePoint Online is used for shared files, but can seem overwhelming to get started with. However, it doesn't have to be a technically difficult exercise to benefit from SharePoint. Our course gives you an easy-to-understand introduction to the program.

Everyone uses Windows 10. But few have been introduced to the smart features that can make everyday life easier. It only takes a small investment for the individual to get much more out of this basic system.

We also have courses in:

Planner • To Do • Outlook • PowerPoint • Excel • Word • OneNote • PowerBI • Yammer
