

Universal Payments Connector

All of the choice, all of the control, none of the integration

Trusted by:

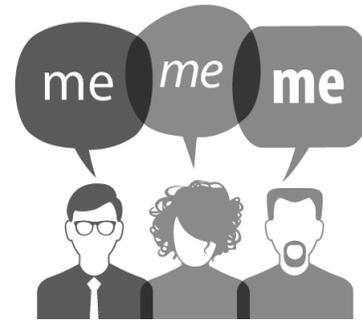

GENASYS
Technologies RSA

Universal Payment Connector

A **PROMISE** of hassle-free access to global payment ecosystem

Deliver business efficiencies

Better engage customers

Solving the integration problem for enterprises

Reduce cost, increase efficiency, modernise systems and exceed customer expectations

Integrations made simple

Imburse is the most comprehensive **cloud-based ecosystem** of transaction service providers and technologies. A single connection to meet any transaction requirement, instantly and at no cost.

Without Imburse:

Multiple Integrations

Take years, cost millions, market by market

With Imburse:

A Single Service

Deploy immediately, globally and at low cost

Imburse makes running a business simple again.

Simplifying payment integrations

A dashed-line box contains a grid of logos for various payment providers and brands. The logos are arranged in several rows:

- Row 1: worldpay, Braintree, ingenico ePayments
- Row 2: SEPA (Single Euro Payments Area), optipay, Faster Payments
- Row 3: LEMONWAY, epay, Worldline
- Row 4: CREDIT SUISSE, SIXT, Marriott HOTELS · RESORTS · SUITES
- Row 5: TANGO CARD, BARCLAYS, Deutsche Bank
- Row 6: amazon, mastercard, AMERICAN EXPRESS
- Row 7: MediaMarkt, VISA

Easy set up ...

The screenshot displays a web application interface with a blue sidebar on the left and a main content area on the right. The sidebar contains a logo at the top and a list of navigation items: Home, TENANT (Info, Users), MARKETPLACE (Apps, Rewards), SCHEMES (Collect, Payout), and DEVELOPERS (API Keys, Documentation). The 'Apps' item is highlighted. The main content area shows the breadcrumb 'Home / Apps' and the title 'Your apps'. Below this, there are two sections: 'For collection' and 'For payout'. The 'For collection' section contains five cards: Braintree (A PayPal Service), stripe, worldline (e-payment services), worldpay, and an 'Add' button with a plus sign. The 'For payout' section contains four cards: Tangocard (TANGO CARD), TRANSACTIVE, VISA (Visa Direct), and an 'Add' button with a plus sign.

Clients set up its preferred partners and payment types

Global variety and complete access...

The screenshot displays a web interface for configuring payment apps. The left sidebar contains navigation options: Home, Info, Users, Apps (selected), Rewards, Collect, Payout, API Keys, and Documentation. The main content area is titled "Install collection app" and lists eight different payment providers, each with its own configuration options for supported countries, currencies, categories, and payment methods.

Provider	Supported Countries	Supported Currencies	Categories	Payment Methods

... and easy to deploy!

The screenshot displays the 'IMBURSEDOCS' website. At the top left, the logo 'IMBURSEDOCS' is shown in green and white, with a breadcrumb trail 'Home / Getting Started'. The main heading is 'Getting Started', followed by a sub-heading: 'A suite of documents explaining how the various objects in the Imburse API work together.' Below this, there are six document tiles arranged in a 2x3 grid. Each tile features a green document icon, a title, and a brief description.

Document Title	Description
Introduction	Getting starting with the Imburse APIs.
Authentication	How authentication works and how to create Management and Payout bearer tokens.
Account Management	Managing Account API Keys, setting up NEW Tenants, and managing Tenant API Keys.
Tenant Users	Managing Tenant Users.
Tenant API Keys	Managing Tenant API Keys.
Marketplace	Searching for and installing Apps from the Marketplace.

Clients preferred IT partners can use Imburse APIs to deploy products

solutions
... immediately

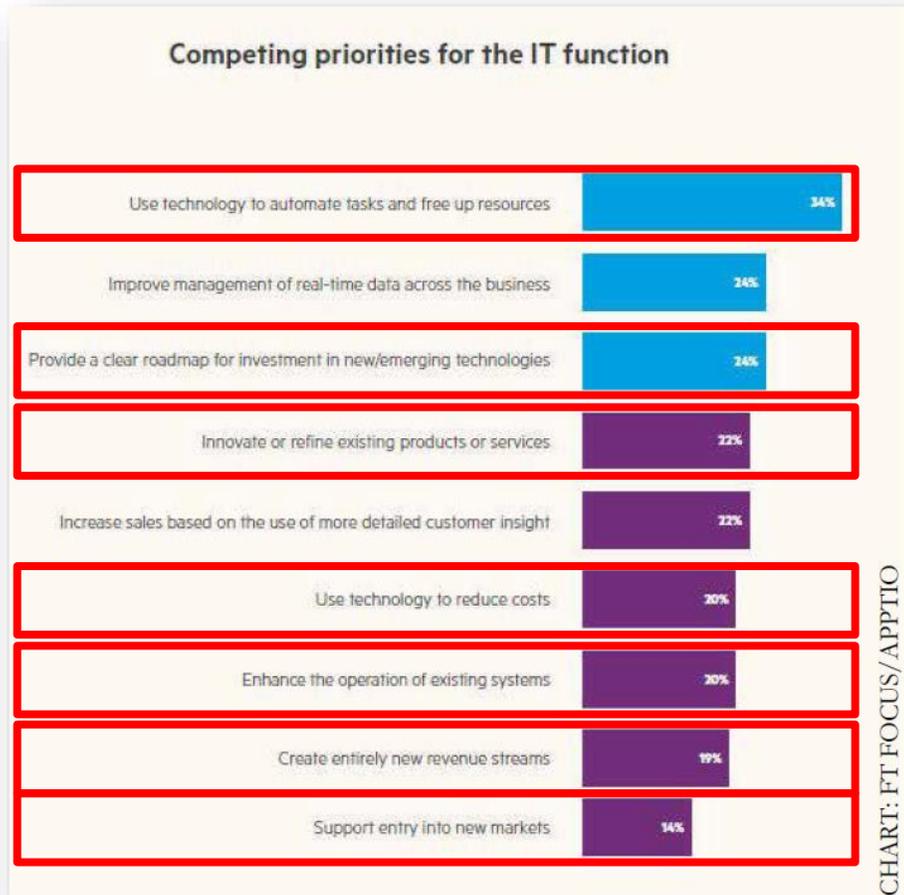

Our Promise to **CFOs**

Freedom to
choose and
optimize
... constantly

IMBURSE enhances payments as a key business
value driver and a competitive advantage

Simultaneously deliver better customer engagement as well as business efficiency

Global recommendation to act

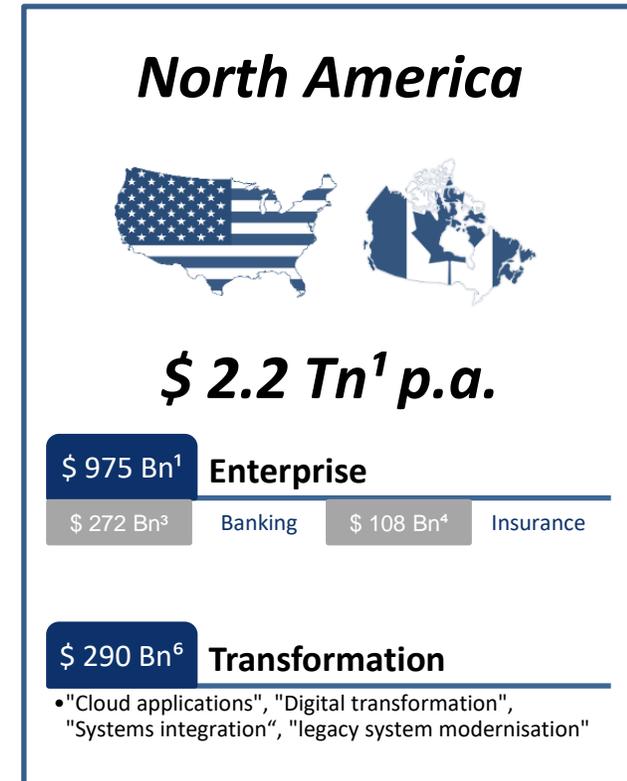

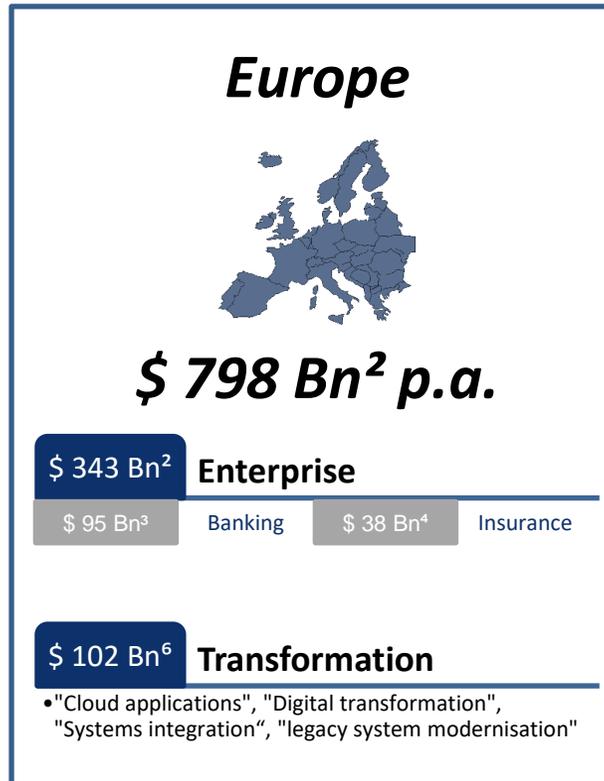

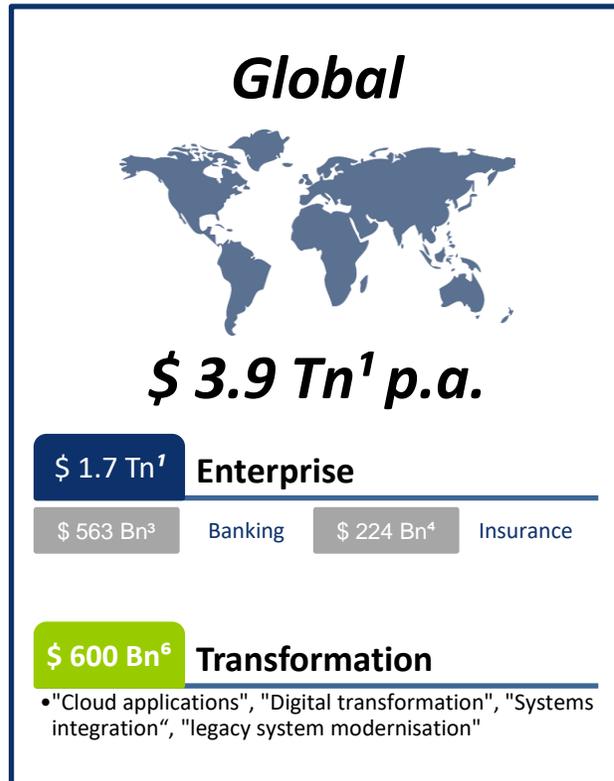

IT buyers have shifted away from costly on-premise equipment in recent years as they move more workloads into a pay-as-you-go model in the cloud.” – WSJ [click here](#)

Global and industry recommendation to act immediately and be cloud-native

IT spend is too high

“For now, refreshing technology, lessening dependence on legacy systems, strategic outsourcing, and the use of cloud infrastructure and applications are an easier way to make room in the budget, rather than going to the CFO and asking for a large increase.”
