prodsmart

prodsmart

is a **complete analytics**, **management** and **optimization system** for **manufacturing assembly lines** and **job shops**.

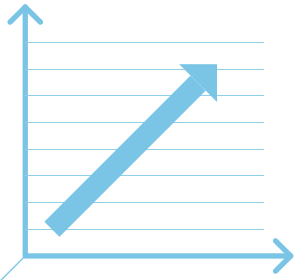
prodsmart

Clients

Our software works in factories
in a different range of industries:

- electromechanics
- auto parts
- construction
- electronics
- food
- metalworks
- toys
- jewelry
- 3D printing
- metal polishing

prodsmart

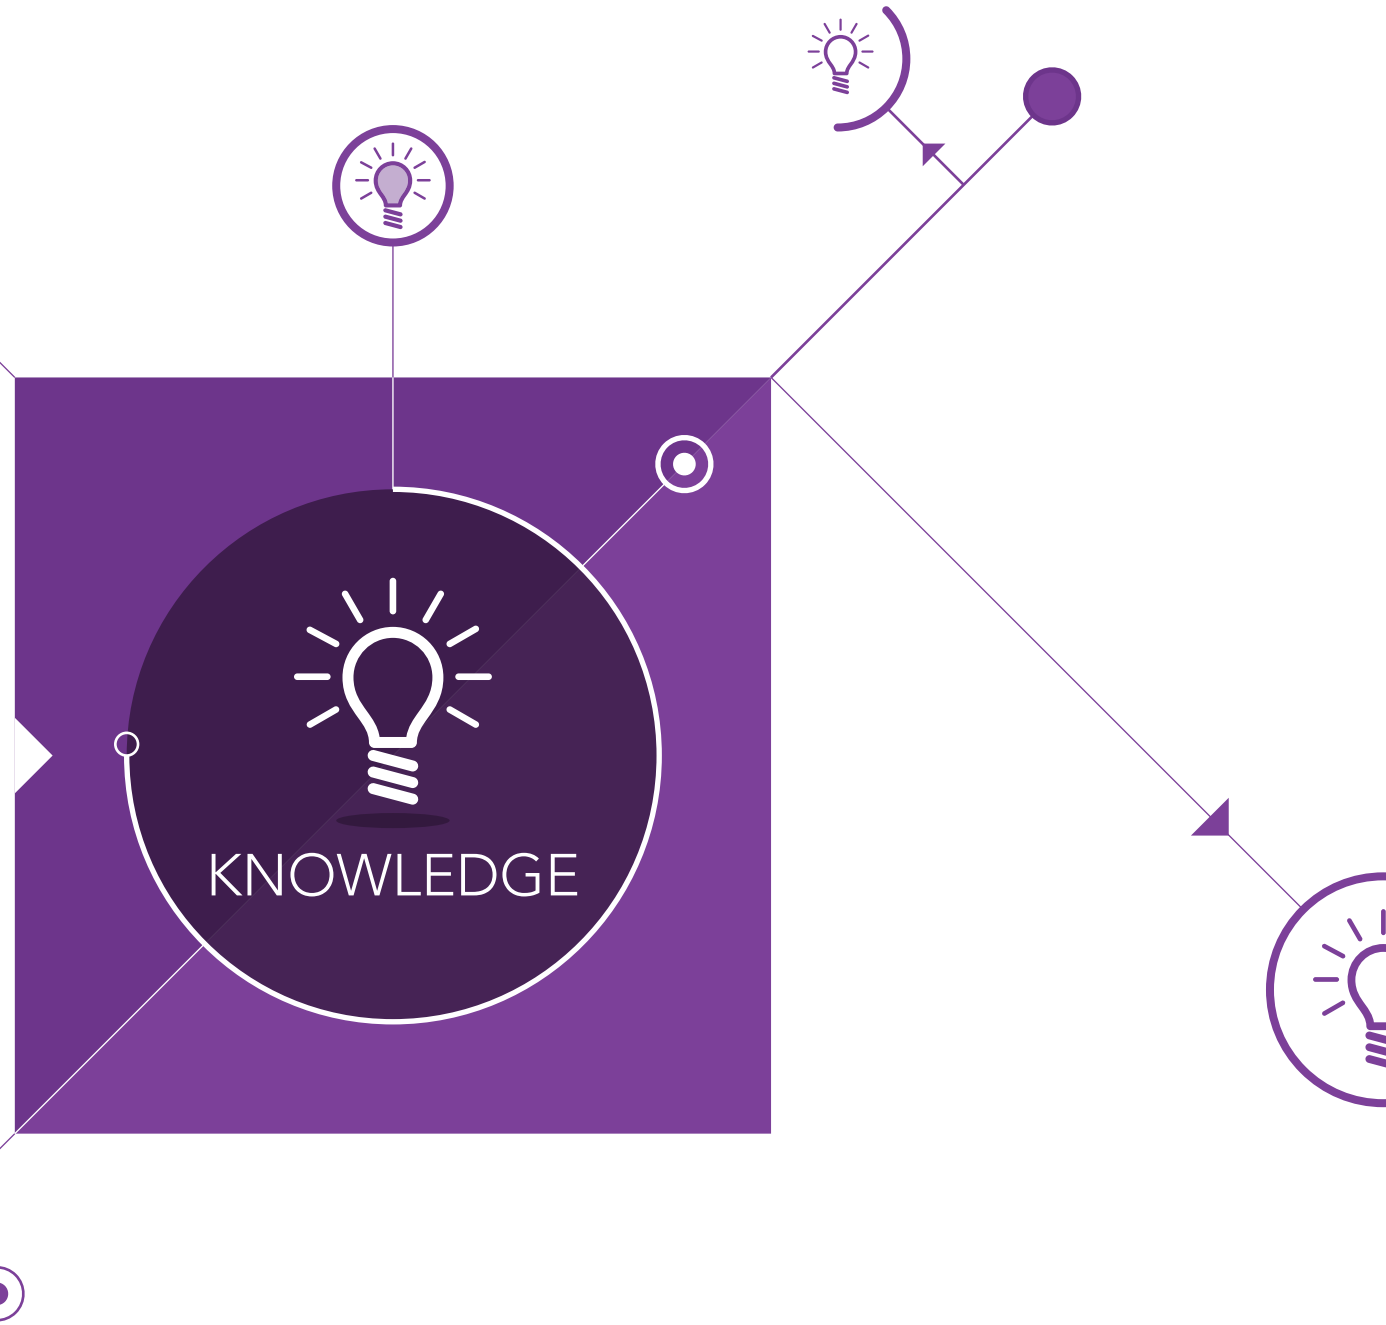


Mission

Empower **your factory** to be more **lean**, **productive** and **efficient**.

prodsmart

Connect knowledge
with instant action
to generate opportunity
in an unprecedented way.

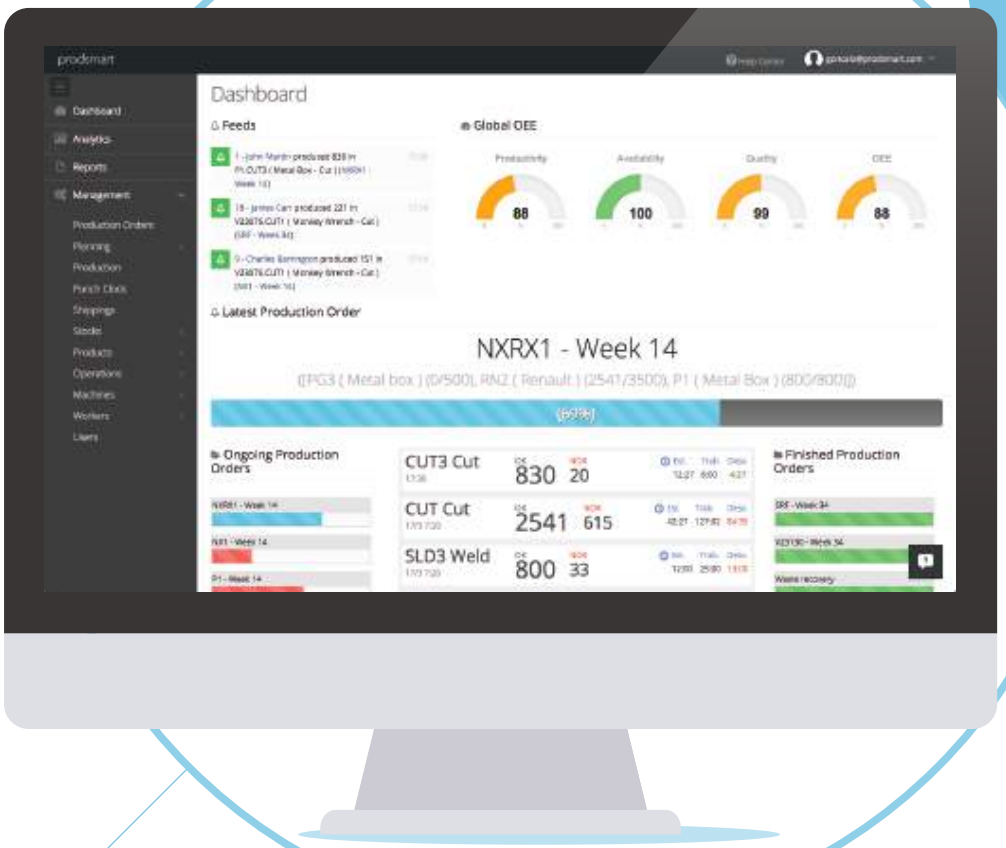


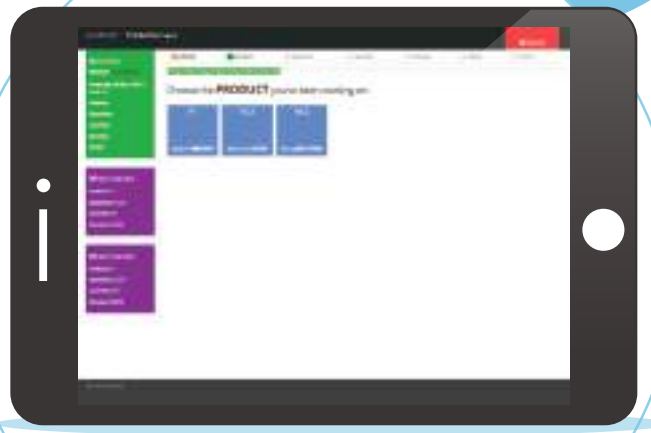
prodsmart

Our software has two components:

A management and analysis module (for management)

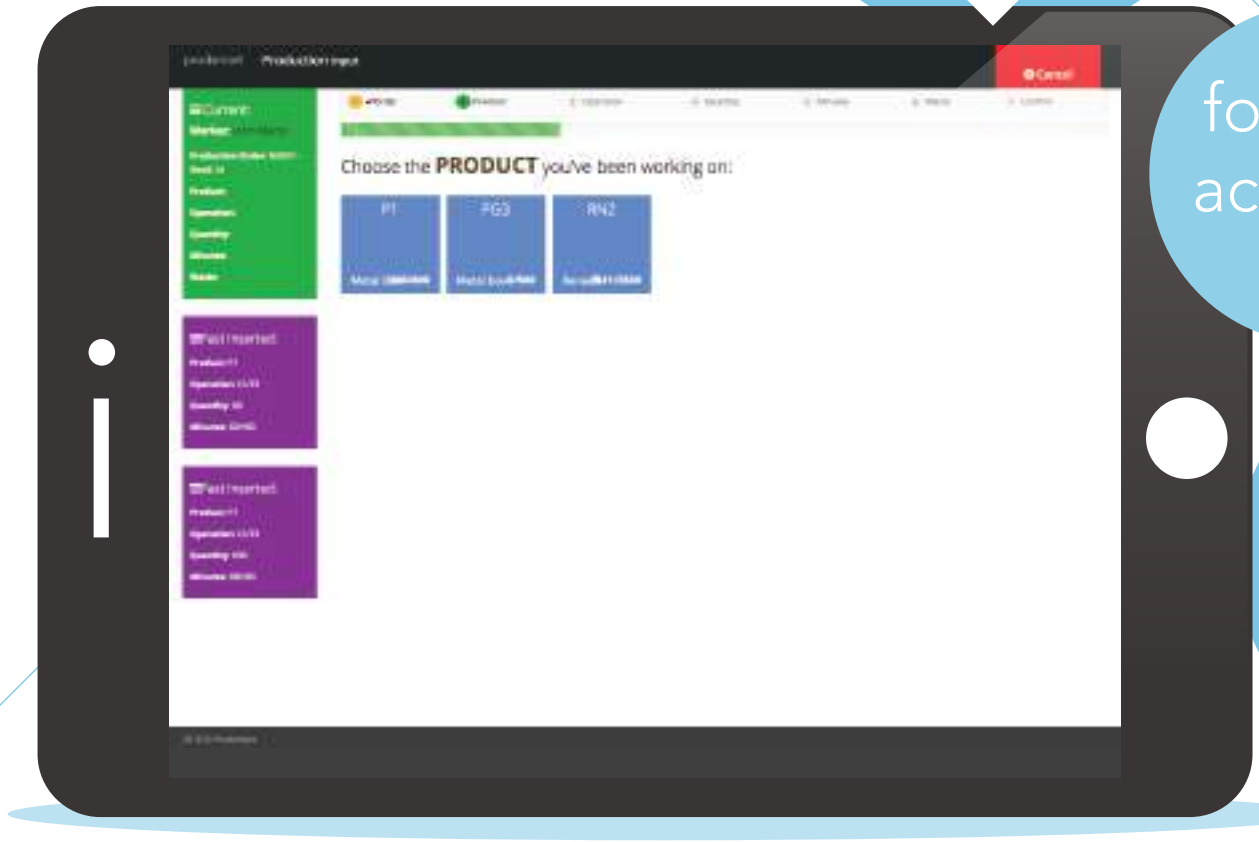
A data insertion module (for production workers)





prodsmart

Workers insert the production data



for their activities in a

very **simple** and **intuitive** way…

prodsmart

…and information
is updated
in the management
and analysis module
in real time.

prodsmart

For our clients:

KNOWLEDGE

Know every detail of your production history and current status

AGILITY

Instantly adapt to production circumstances

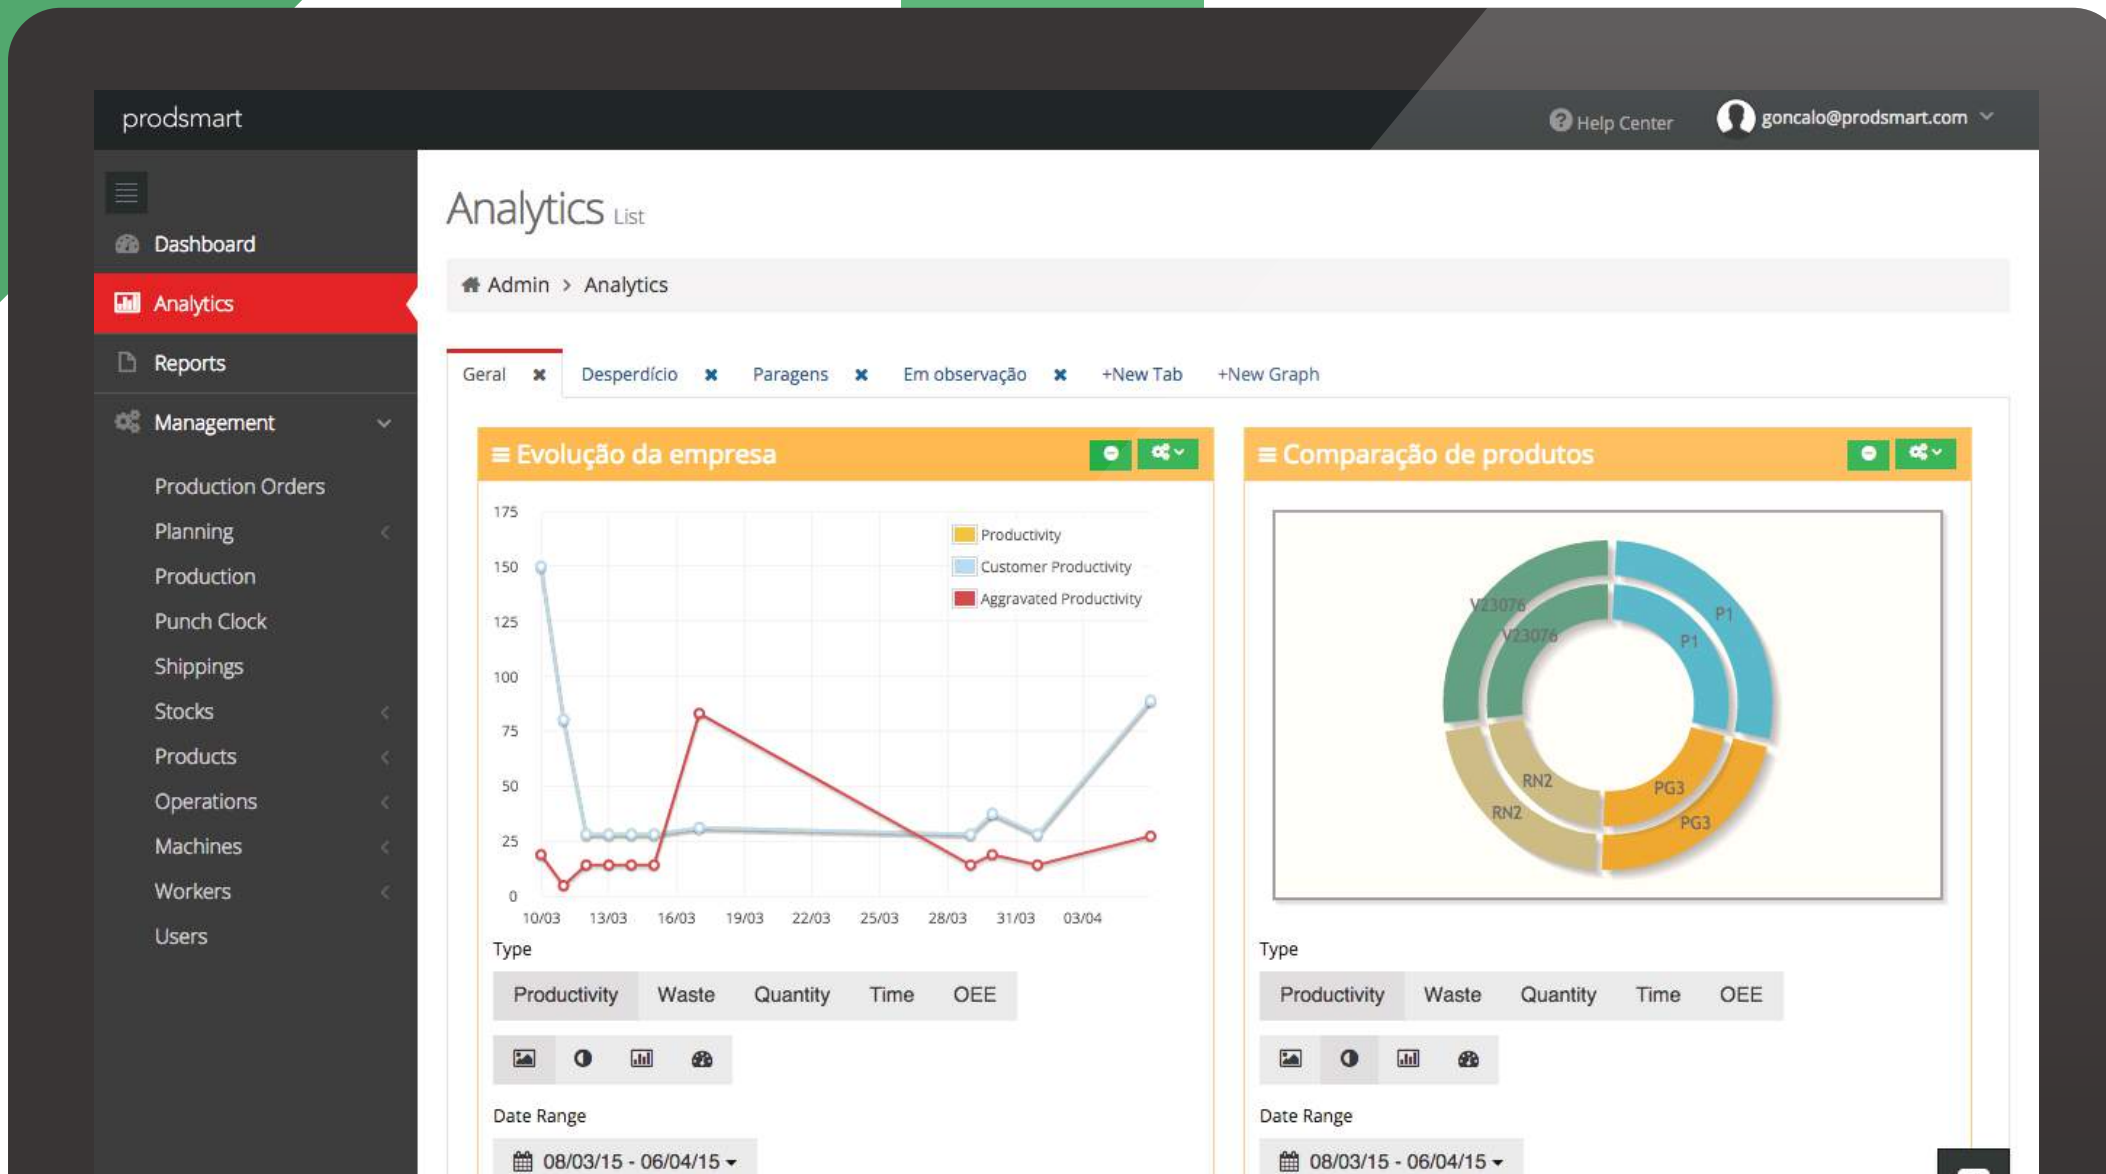
PLANNING

Empower your workforce with data-driven decision making

prodsmart

KNOWLEDGE

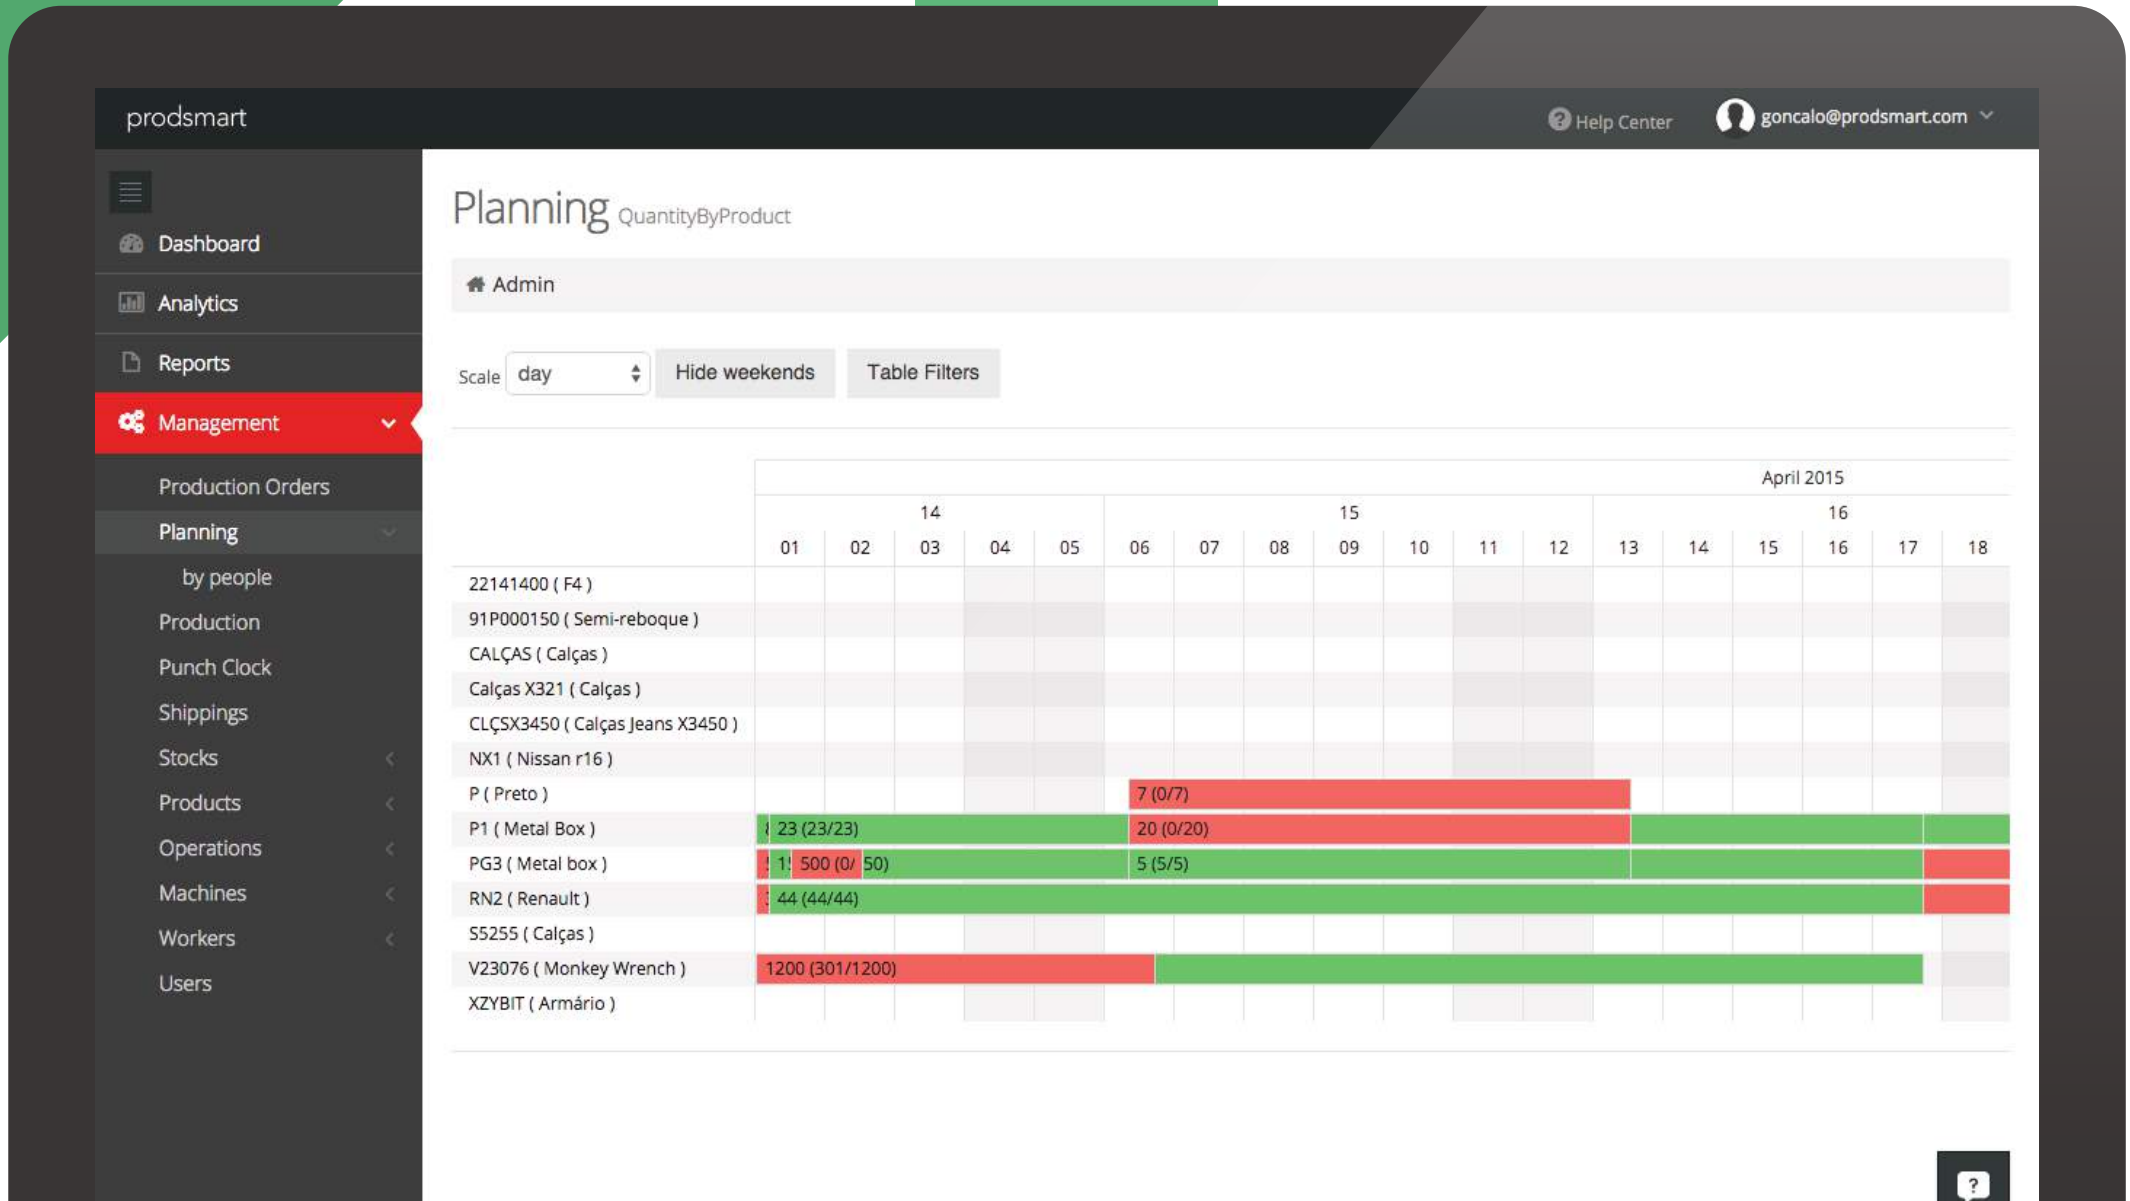
Know every detail of your production history and current status



prodsmart

AGILITY

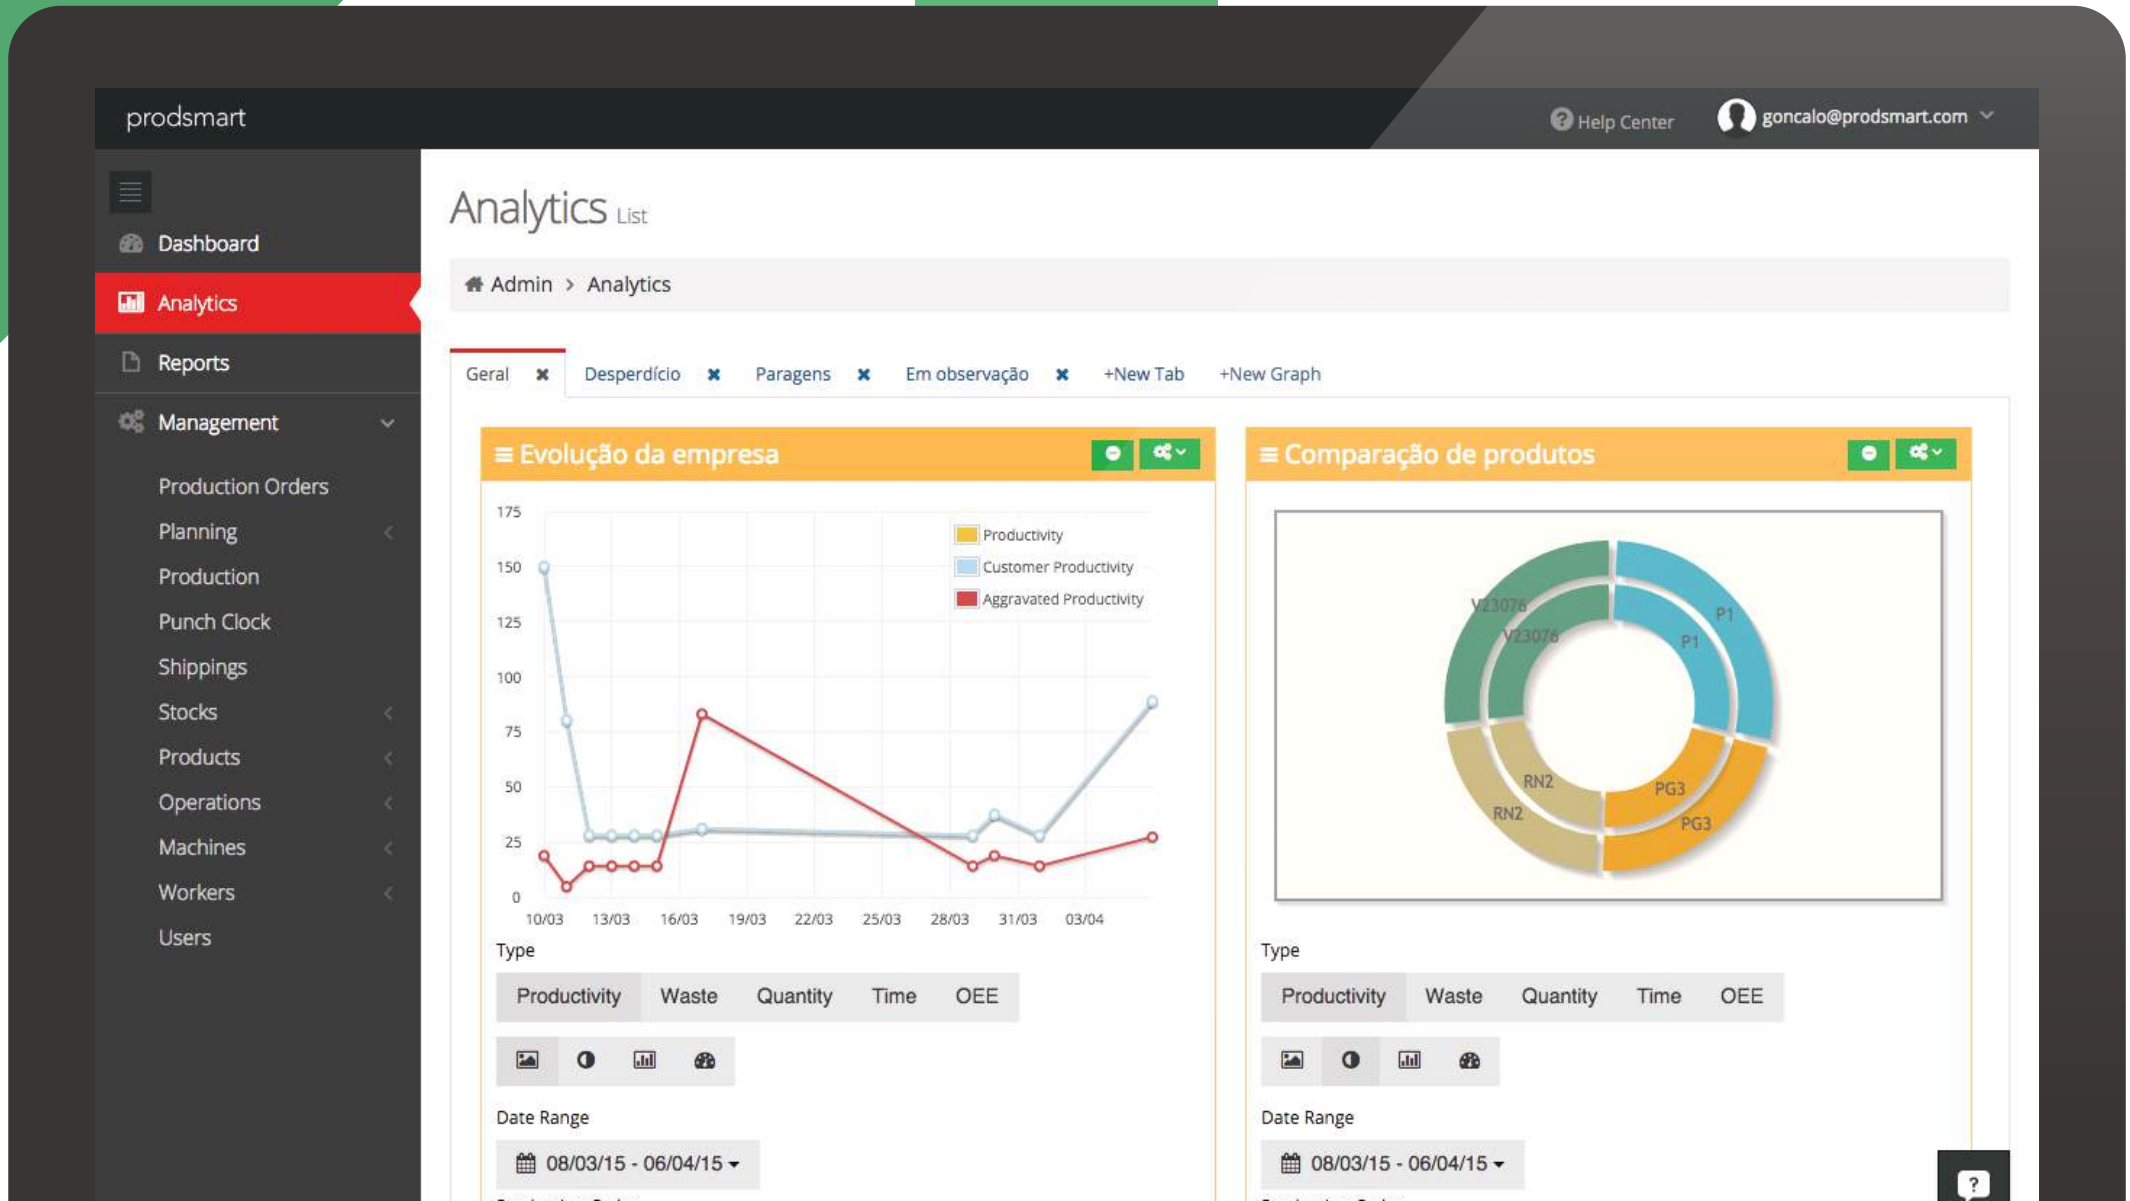
Instantly adapt to
production circumstances



prodsmart

PLANNING

Empower your workforce
with data-driven decision making



prodsmart

Features:

1. Plant Floor Control
2. Planning & Scheduling
3. Real Time Dashboard
4. Mobile Access
5. Product Traceability
6. Inventory Management
7. Customizable Reports
8. Production Workflow
9. Real Time Information Flow
10. Cost Accounting
11. Equipment Maintenance
12. Real Time Alerts

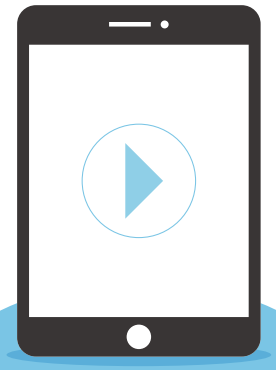
prodsmart

Purpose

The best way to change long-term behavior is with short-term feedback.

Getting 1% better every day is easier and better than getting 10% better every year.

That's why we developed a system that gets all the data from your factory floor in real time.



So you can stop wasting time collecting the data in paper and start using that time to improve the way your factory works every day.

prodsmart

Advantages

1. Remove paper from the productive process
2. Eliminate errors usually generated by traditional paper-based data-entry
3. Get real-time data from all the activity on your factory
4. Cross-analyze and crosscheck production data in a simple way
5. Integrate with any ERP your company currently uses
6. Access your company's data from any web-enabled device, with total security
7. Get notifications about your production via SMS, email and our web app
8. Increase productivity, reduce waste and increase efficiency

prodsmart

For production managers

1. Get rid of your paper-based management process
2. Get access to your data from any web-enabled device
3. Get all the data you need updated in real-time

For workers

1. Always know what you have to do
2. Always know how you are performing
3. Always know your impact in the big picture

prodsmart

For human resources managers

1. Know everyone’s contribution to the overall effort
2. Know everyone’s absolute and relative performance
3. Know what everyone is doing and how they are performing

For financial controllers

1. Know your most valuable resources
2. Know the ROI for everything in your factory
3. Know what you’re spending in all steps of the process
