Our Mission

Montrium believes that life sciences organizations deserve solutions and services that are as modern, well-designed and easy-to-use as the ones we use in our daily lives. We also believe that this type of engineering and design can be achieved without compromising compliance or increasing costs.

Our Approach

Because our cloud-based platform is already deployed and qualified, the time required to get up and running is significantly reduced. Our subscription model allows you to access our applications for an easy-to-manage monthly fee with no other hidden charges making budgeting a breeze.

With Montrium, you can look forward to:

- Pre-configured solutions
- Low setup fee
- Monthly subscription
- Accelerated onboarding
- Dedicated support teams

Industry

Pharma/BioTech

Improving traceability control and collaboration around records and quality management.

Contract Research

Empowering CROs with new clinical tools that add value to their existing service offerings.

Manufacturing

Facilitating the update and distribution of methods, specifications and GMP records.

Medical Device

Enabling medical device organizations to centralize information in a distributed development environment.

Non-profit

Making sure that non-profit groups can focus more on patients and less on administration.
