

The Cloud, Done Right.

Azure Managed Services

Underpinned by Microsoft Premier Support

Umbrellar is New Zealand's only dedicated Azure & Azure Stack Managed Service specialist. That's why successful Kiwi companies of all sizes choose us to transform their businesses.

We have built a practice around DevOps, automation, and cloud-native infrastructure and platform management. We use the best Azure features while designing services - be it IaaS, PaaS, or SaaS offerings — in order to meet your demanding, unique business requirements.

We act as a one-stop shop providing a common service management, provisioning, and orchestration experience - all within a flexible PAYG commercial model. We don't see the managed services practice as separate from hosting, systems integration, or application architecture requirements. Instead, we incorporate all of these valuable services as a unified managed services offering to support the evolution of your business. A modern 'born in the Cloud' managed services practice.

Most importantly, our Azure MSP is a modern partnership. Modern partnerships focus on differentiation, highly optimised operations, and customer life cycle value management.

Discover

Choosing the right cloud partner is critical. We have the most people on the ground in NZ to help you accelerate enterprise wide adoption by offering assessment and planning, migration management, architectural guidance, deployment and lifecycle support. We offer the right solutions and partnership.

Professional services

We understand the need for a more responsive, flexible, scalable and more competitive solution. This means the right technical solution, providing you peace of mind. You need experts in configuration management, back up and DR, identity management, automation and DevOps. But most importantly, you need it done right.

Service management

You need a partner who is an expert that overlays excellence in governance, monitoring, cost optimisation, and support SLAs. We deliver every time so that you can thrive not just survive in the cloud. With our Azure Managed Services you get around-the-clock support. Umbrellar manages the full cloud lifecycle with the expertise you need to address your transformational goals.
