

Crisp uses the power of the cloud to connect and analyze all of your data sources providing you with real-time insights and trends.

## Import

Crisp's Open Data platform seamlessly connects and imports all of your data from your retail and distributor portals. Your data is encrypted and stored safely.

## Organize

Powerful AI and machine learning organizes disparate data sources and identifies new insights and opportunities.

## Visualize

Your data is visualized in an easy-to-read, and easy-to-share, customizable dashboard with up to the nanosecond insights.

## Export

Use the platform dashboard or export the data feed to the business intelligence tool of your choice.

Manage your supply more efficiently, lower waste, and skyrocket profitability.
