

# Create purchase requisitions (PRs) for goods and services from anywhere and automate your purchasing process

Powered by Microsoft Power platform

## Easy to use app on mobile or tablet devices

Employees can easily raise requisitions and send them for review using an intuitive interface

## Multiple approval workflows

Either use hierarchy based or straight line workflow for reviewers to approve or reject the requisition

## Existing vs Write-in products

Employees have the privilege to select a product from existing inventory or type in product name if the product is missing from inventory

## Quick insights

Charts and graphs are available to quickly get the insights around requisitions data
