

# DataRedKite

Solution for Data Lake audit & management

## Our Solution

### MONITORING ALL ACTIVITIES ON THE DATA LAKE:

- Access, reading (numbers of data red), writing (numbers of data written), rights, modifications... at the finest mesh.
- Associated volume for each project – data source.

### ENTRY POINT FOR DATA LAKE:

- Visualization and availability of the data (without a direct access on the data lake)
- Access to specific data on the different data sources
- FinOps

### GET A 360 VISION OF THE USERS AND MACHINES ACCESS:

- Listing of users' accesses
- Access history of access and rights on the data lake
- History of users' activities

DataRedKite can restore your data in any preferential format.

SQL Database

Delta

Elastic Search

DataRedKite can work with your favorite data visualization tool.
