# Sophos Security for Microsoft Azure

Securing Azure infrastructure, data, cloud access, and configurations.

- All-in-one network security with next-gen firewalls
- Cloud workloads protection against sophisticated attacks
- Deep packet inspection for Azure with IPS, ATP, URL filtering, and in-depth reporting
- Easy to set up VPN for remote connection to Azure virtual machines.

Smarter, End-to-End Public Cloud Security

Synchronized Security

An industry first, Synchronized Security links your endpoints, servers, and firewall to enable unique insights and coordination. The Security Heartbeat™ relays endpoint and server health status and enables your firewall to immediately identify and respond to a compromised system on your virtual network. The firewall can isolate systems until they can be investigated and cleaned up.

Server & workload protection

- Intercept X for Server Protects your servers, and your data, from malware and ransomware extortion
- Whitelists trusted services in minutes, while intelligently allowing updates
- Unifies policy management in Sophos Central to manage server workloads – hybrid security made easy!

Cloud security posture management

- Cloud Optix agentless, SaaS-based service works perfectly with your existing business tools to simplify cloud security monitoring and compliance
- Multi-cloud asset Inventory with complete network topology visualization
- Continuously monitor compliance with out-of-the box CIS, GDPR, SOC2, and PCI DSS templates

Next-gen firewall

- Deep packet inspection for Azure with IPS, ATP, URL filtering, and in-depth reporting
- Bidirectional antivirus for WAF with authentication offloading, path-based routing, and country-level blocking
- Easy to set up and easy to use self-services SSL and HTML5 VPRN technologies that make connecting from anywhere and on any device a reality – without administrative overhead
