HOPEX Privacy Management

Assess and comply with global data privacy laws such as GDPR and CCPA

Companies are feeling the pain of having data breaches or getting fined for violating data privacy regulations. Use privacy management software to meet regulations, produce regulatory documents, and break silos across people, process, and technology to prevent violations. Quickly understand your compliance level and accelerate the implementation of your remediation plans.

## Benefits

- **Quickly understand your compliance level**
  DPO's and cross-functional stakeholders can assess and understand how your organization complies with privacy regulations thanks to a collaborative workspace

- **Analyze risks and implement remediation plans**
  Carry out Data Protection Impact Assessments (DPIA) to prioritize your remediation activities

- **Automatically generate reports to demonstrate compliance**
  Document and demonstrate compliance with a full range of reports designed for the supervisory authority
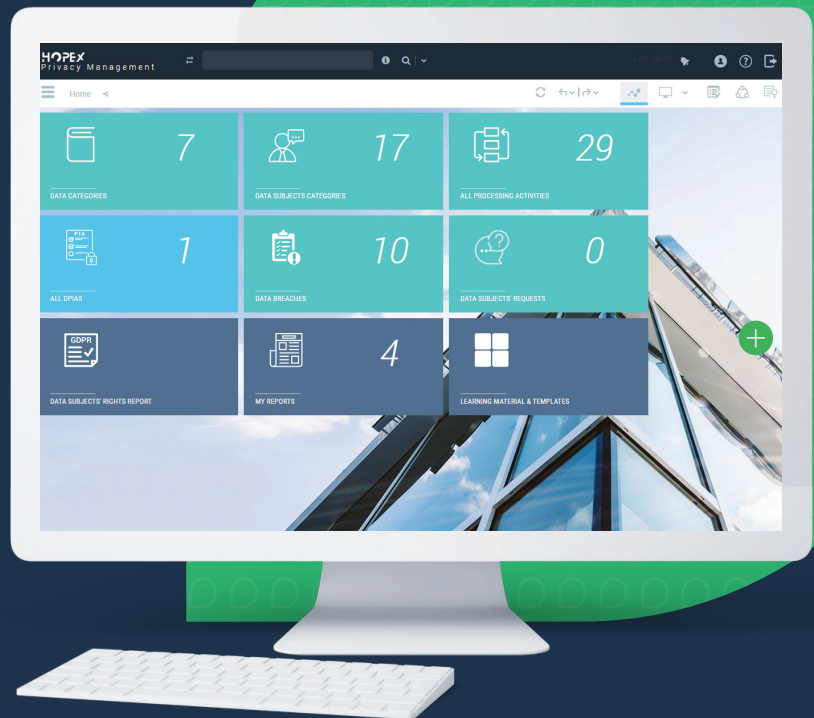

Map Data
Map data to understand how personal data is used and processed in your company. Identify how processes or applications are handling sensitive data and specify what the purpose and legal basis for processing. Build and maintain up-to-date records of your company's data processing activities and respond more efficiently to data subject rights requests.

Conduct assessments
Address privacy-related regulatory requirements and conduct Data Protection Impact Assessments (DPIA) by working with compliance stakeholders using a collaborative platform. Automate privacy impact assessments (PIAs) and data protection impact assessments (DPIAs) and prioritize processing activities by risk scale and compliance level. Document and assess risks affecting the rights and freedoms of data subjects and issue recommendations.

Ensure and demonstrate compliance
Achieve and maintain compliance by tracking the implementation of the recommended actions to mitigate the identified risks. Manage the requirements of the new data privacy regulations by analyzing your organization's efficiency at responding to requests within the regulatory deadlines. Monitor your compliance level and demonstrate it to the regulatory authority with a full range of reports.

Key Features

HOPEX Privacy Management helps you to map data, conduct assessments, and comply with regulations.

Map data

Identify processes or applications handling sensitive data categories

- Specify categories of involved data subjects and legal basis for processing
- Assign DPOs and Data Controllers processing activities to coordinate compliance efforts
- Build the inventory of your processing activities
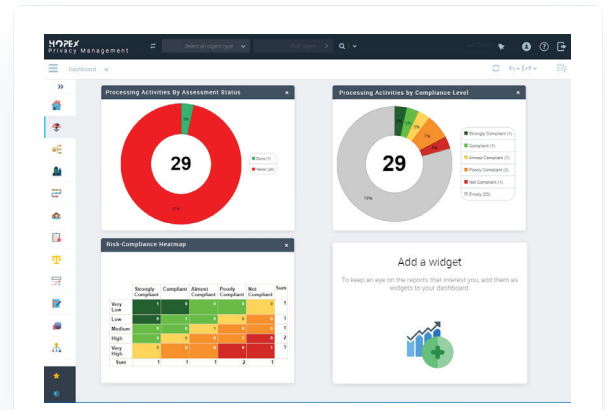

Dashboard

Conduct assessments

Understand the sources of risk and measure your compliance level

- Conduct Data Privacy Impact Assessments (DPIA)
- Prioritize processing activities by risk scale and compliance level
- Document and assess risks affecting the rights and freedoms of data subjects
- Document data breach incidents and manage Data Subject requests

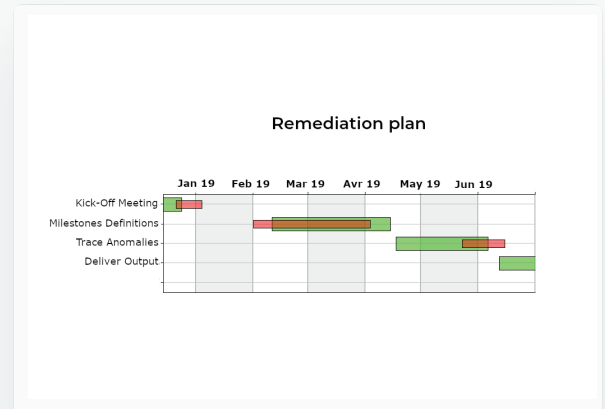

Remediation plan – GANT chart

Ensure and demonstrate compliance

Prepare and produce in one click reports to analyze compliance level and demonstrate that regulatory requirements are met

- Record of processing activities
- Data Protection Impact Assessment
- Data transfer maps
- Subject rights report
- Risk and compliance indicators

Record of processing activities
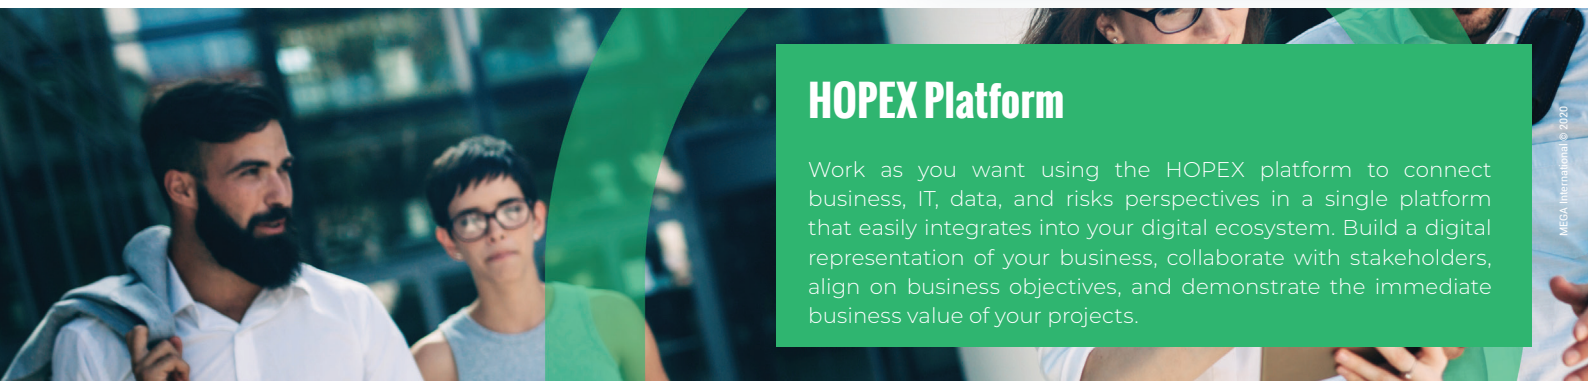

HOPEX Platform

Work as you want using the HOPEX platform to connect business, IT, data, and risks perspectives in a single platform that easily integrates into your digital ecosystem. Build a digital representation of your business, collaborate with stakeholders, align on business objectives, and demonstrate the immediate business value of your projects.
