Azure Expert MSP

Database Consolidation, Modernisation and Migration to Azure

Proactive optimisation of databases and the data they contain, consolidating and modernising them with Microsoft's powerful cloud, Azure

Take your database infrastructure to new heights by leveraging Microsoft's powerful cloud, Azure. Dimension Data provides both professional and managed services for consolidating, maintaining and optimising your SQL databases on Azure. We consult on, and provide the perfect solution for managing and extracting data in the secure and highly compliant Azure environment

Power BI specialists provide bespoke solutions to extract data in a meaningful and efficient way to enable companies to make proactive and responsive decisions as quickly as possible. With solutions tailored to your specific business needs and goals, our expert team will offer strategic guidance and support at every step along the way to ensure a successful, simplified and flexible database environment on Azure.

Simplify and streamline your database infrastructure. With expert guidance and strategy, databases are consolidated, optimised and supported in a proactive way by a team of certified Microsoft Database Administrators.

Why customers use Database Consolidation and Modernisation Services

- Consolidation of databases, which are hosted on Azure. This enables database optimisation and ensures your environment is modernised.
- Simplified management of databases with our team's constant guidance and support.
- Enhanced database usage and cost reduction within a secure, best-of-breed Azure environment.
- Extraction of meaningful data to drive more informed decisions.

Dedicated Team of Experts

24/7 Support with dedicated DBAs

Reduce redundancy and rapidly resolve issues with multiple resources. Our full Managed Service offering includes proactive monitoring, management and reporting of your database environment.

With in-depth consultation for optimising database management and detailed reporting, we will guide you at every step along the way.

Managed Database Services

Simplified Database Management

With the flexibility of on-demand database provisioning and scalability using the cloud, your organisation can eliminate overhead costs of owning infrastructure.

Our customised solutions will offer strategic guidance to help meet your organisation's needs and reach your business goals.

Business Analytics

Extract of meaningful data

Access actionable data insights at anytime, from anywhere with Microsoft Azure's cloud technology.

With lower costs for greater analytic capabilities using Microsoft best practice, your organisation will be able to make smarter business decisions, backed by data insights.

'We have specialised in SQL server technology because of our belief that it is the best database technology available for the needs of our customers globally. SQL server in Azure is a powerful tool for managing data while being one of the most simple to configure. SQL and Azure security is best of breed; a market leader while retaining a low cost to implement.'

– Marius Janke, General Manager, Dimension Data Data Services

How Database Consolidation, Modernisation and Migration to Azure works to achieve business benefits

Dimension Data Solution

- Managed SQL services in Azure
- Maximise and consolidate database resources
- Reduce and consolidate costs
- Large Microsoft certified skilled and experienced team

Joint Solution

- Unparalleled SQL and Azure Security
- Microsoft layered approach to security
- Reduce risk of data breaches and threats
- Drive digital transformation and leverage cloud technology

Power BI

- Reduction of time for data analysis
- Self-service data analytics anywhere at any time from the Azure cloud
- Lower costs for more accurate data analytics
- Converting abundant data into useable, intelligent insights with analytics and Business Intelligence to drive smarter, more strategic business decisions.

Our Database Management Solution Promise

- True 24/7 support with dedicated Database Administrators to ensure rapid issue resolution and consistent delivery.
- Professional consulting services to guide you on and deliver database management and optimisation.
- Power BI solutions to extract the most value from your data.
- Migration of SQL data to a secure Azure cloud environment.
- With Dimension Data, managing and making sense of your data is made easy.

Tangible Benefits / Desired Outcomes

- Lower costs for data management, analysis and storage
- Stability, flexibility and scalability of database environment
- Better data security
- Meaningful and easy-to-use data analytics
- A reliable partner to develop a roadmap for implementation and modernisation, as well as to advise on database structure and provide Managed Services which offer proactive diagnostics and quick and effective support.

Why Dimension Data?

Dimension Data has a proven track record as a Microsoft partner with a large skilled and experienced team of Microsoft-certified DBAs and PowerBI specialists. Data is managed in the highly secure Azure environment. Databases are consolidated, optimised and supported in a proactive way by a team of certified Microsoft Database Administrators. Power BI specialists provide bespoke solutions to extract data in a meaningful and efficient way to enable companies to make proactive and responsive decisions as quickly as possible. Dimension Data provides all aspects of IT services from infrastructure to applications development on various platforms. This gives us the ability to deliver solutions for any IT problem. This supports the vital applications development work we provide to an organisation's end user. As a Microsoft Azure Expert MSP partner, we are able to provide a full end-to-end solution to an organisation in every industry vertical. Our capability across the full IT stack of connectivity, networking, security and applications, enables us to provide supporting services giving you an advantage.
